Council Member Holm stated that her office had worked since last May trying to address the issue and get a solution appropriate and suitable for the entire neighborhood and immediate community; that some were not totally happy with the outcome, but she hoped they all understood it was weighed carefully and was a component of the neighborhoods wishes and desires and best interest for the future as they continued to grow into an urban community. Council Members Clutterbuck, Wiseman, Holm, Brown and Berry absent.

Upon questions by Council Member Edwards, Mayor White stated that the Planning Commission reviewed MUD's when they came up; and they could review this particular issue through Council Member Lawrence's committee, it was a good idea; that he usually got good feed back on MUD's and when he did not have consent and unanimity he would take a personal look into it; that there were issues when they wanted housing built in a particular place there was a financing vehicle that would deal with the infrastructure and was it a part of the overall plan because some projects were already started before they came and they could not just shift gears; and Council Member Edwards stated that the Planning Commission seemed to be tied to a strict yes or no and did not have liberty to look at other plans so she would suggest sending it through Council Member Lawrence's committee. Council Members Clutterbuck, Wiseman, Holm, Alvarado, Brown and Berry absent.

Council Member Lawrence stated that the Development Regulatory Affairs met last week

and would not meet again until April 20th; and with this being an agenda item that was something to consider; and Mayor White stated that he wanted to make sure there were policies and criteria's concerning MUD's so it was not Ad Hoc in dealing with applications for inner city MUD's, you had to look at what development documents were submitted when the original development was platted because you could not change rules in the middle of the game and it was an excellent idea to have elected officials look at the policies. Representative Turner stated that he wanted to thank Mayor White and the Members of the City Council, that it was not just with the efforts that he had put forth, it was a collaborate effort, with the Mayor's support and involvement in getting the park developed, that he and people in the area appreciated that, that the park sat in District A and he and Council Member Lawrence went out and looked at it and talked about it non stop and worked together and he wanted to thank her for her efforts, that it would serve both District A and District B, that one thing they noticed a few years ago was that they had Minute Maid Park but there were many families in his district and many others whose families simply could not attend the Minute Maid Park and for them a neighborhood park was the closest thing to a field and in this area there had never been a baseball field, except the ones that they made themselves, and there had never been a baseball league, so a part of developing neighborhoods and communities was trying to establish something in the neighborhood that people could go to, that without the City's help, the Texas Parks and Wildlife, the Acres Homes Citizens Council and the private sector it would not be possible, that his name was there but the reality was that without people like Centerpoint, Reliant and AT&T the park would not have happened and the City's Parks and Recreation Department had been great in working on the project, that he wanted to say thank you very much, that it had been his pleasure to work with the City, State, the private sector and community groups to make it happen. Council Members Wiseman, Alvarado and Brown absent.

21. ORDINANCE providing for Passenger Facility Charges at William P. Hobby Airport – was presented, and tagged by Council Members Wiseman, Lawrence, Garcia, Edwards and Clutterbuck.

Upon questions by Council Members, Mr. Hall stated that the federal regulations authorized that it could be used for eligible projects that had already been completed and would have been eligible had it been charged at the time and for projects obviously going forward, that what it did was create a mechanism used by the overwhelming majority of airports across the Country, certainly all of the large ones, to help fund basically capital projects, capital kind of improvements at the airport, in effect, it would be used to help support the capital improvement program at Hobby Airport.

After discussion by Council Members, Council Member Berry stated that the PFC was not

perfect but it was widespread throughout the Country and a lot of airports used it, that he hoped the Council Members would find out all of the details before they voted because it was the right thing to do given their circumstances at this time, and Council Member Holm stated that for her the point was not the PFC, that her question was why was it so expensive to operate out of Hobby Airport that they were compelled to charge the fee, what was going on, that she thought they needed to ask some specific questions and get some specific answers.

Council Member Sekula-Gibbs stated that Item No. 24 was to authorize the sale of Casa Real Apartments, that the loan was in default and the loan was initiated in 1997 under a different administration, that she would like a written report from Mr. Wilson as to when did they first recognize that the loan was in trouble and did they have input prior to the end of the line situation that they could have made some changes so that the board would not have gone into default, that number two, were there other loans that were in jeopardy, and maybe Mr. Walsh would have that information, were there other loans that would be relative to low income housing and loans that were made with Federal HUD dollars that were now in jeopardy that they needed to know on Council before they went into default, that she would like to know that, that she wondered if this was something that was indicating another phase that they were coming up to, and another question, for Mr. Wilson to answer in writing, would the loan default jeopardize the City of Houston's standing with HUD for future home loans for low income housing and what mechanism did they have in place in order to not allow the same principles who initiated this project, the Sunnyside Up Project, from going into another entity and coming forward and applying for similar loans that may also run into problems going forward, so those were the questions she had and for that reason she would tag the item and hopefully they would get some information coming forward by next week. Council Member Berry stated that they had talked about how to improve the joint referral process and on average it was now taking about eight months and they would like to get that down to about four months, which was apparently the best practices standard, and one of the things that came out of their working group and the real estate group for the District Council Members to consider was that bringing an item to Council, getting an RCA effectively, getting it on the Council agenda for the Council Members to appoint an appraiser, added three weeks to a month and so the idea was to submit five appraisers per Council office or more or less if they chose, that would be cycled through, from their district, that would be their master list and they could change that at some point, but that way they would not have to come back to Council every time they had to appoint an appraiser and give the delays, they thought they could cut three weeks to a month off of the eight month process and get it closer to four months, that was just something for District Council Members to consider because they were going to bring it out of the working group and he wanted them to know that, and number two, they had already seen some progress, sort of like Council Member Green looking at who had not paid their back taxes made people pay their back taxes, the first round of applications from when they file the application for the joint referral, of the three that they have, two of the three got there in less than a month for the preliminary and before it was taking much more than that, so thanks to Ms. Nancy Collins and their group, and they had been very transparent in getting them the details because it was in the interest of all of them, particularly the City and their revenues, that the process be sped up, so he thought they were on the way to doing that.

Council Member Holm stated that she wanted to commend Council Member Berry and whoever was working with joint referral because it was an incredible, just the snap of a finger, it was much more organized and diligent and much more objective in its process.

Mayor White stated that since they had good attendance at Council, three things that the Council Members needed to know, first, they prevailed at the hearing and more on it would be at the press conference, that second, there would be a special announcement and press conference following the Council meeting concerning the incredible path breaking victory dealing with the property in Sharpstown that was going to be developed by a big nightclub, a number of Council Members were involved in that and the pro bono counsel was amazing, and third, Council Member Sekula-Gibbs pointed out on tagged Item No. 24 that there were a lot of things that were in default on loans made before the present administration that were being foreclosed by the first lien lenders and they were trying to ascertain and it may be that they had to move on it today or that their interest would be forfeited and they would have to pay back money.

53. ORDINANCE approving and authorizing Utility Functions and Services Allocation Agreement between the City of Houston and **BGM LAND INVESTMENTS, LTD.** on behalf of proposed Harris County Municipal Utility District No. 439 - **DISTRICT B – JOHNSON** – **(This was Item 17 on Agenda of March 8, 2006, TAGGED BY COUNCIL MEMBERS LAWRENCE, GREEN, SEKULA-GIBBS and JOHNSON)** – was presented.

Council Member Johnson stated he wanted to thank Mr. Gary Norman for all of the work that he had put into the item, and would move to refer Item No. 53 back to the administration for further review, seconded by Council Member Wiseman. All voting aye. Nays none. MOTION 2006-0237 ADOPTED.

All voting aye. Nays none. ORDINANCE 2006-0279 ADOPTED.

Item postponed until the end fo the agenda.

50. RECOMMENDATION from Director Department of Public Works & Engineering, reviewed and approved by the Joint Referral Committee, on request from Mark R. Yzaguirre, Assistant General Counsel for the University of Houston, on behalf of the University of Houston-Downtown, for sale of a ± 1,790.25-square-foot fee-owned strip of land (known as Schilling's alley), located in the John Austin Survey, A-1, North Side Buffalo Bayou (N.S.B.B.), Parcel SY6-067 - **TWO APPRAISERS and one ALTERNATE APPRAISER - DISTRICT H – GARCIA** – was again before Council.

Council Member Garcia named Mr. Frank Flores and Mr. John Fox as appraisers and Mr. Patrick O'Connor as alternate appraiser and moved adoption of the recommendation, seconded by Council Member Alvarado. All voting aye. Nays none. MOTION 2006-0238 ADOPTED.

Council Member Sekula-Gibbs stated that it had been brought to her attention that there was a deadline on Item No. 24 that basically boxed the Council in to making a decision on the item without the ability for a tag, that she thought that was not made clear at the agenda briefing and was willing to release her tag, but would like to make a statement to the Housing Department, that it was unfortunate that they would bring an item to the City Council without the opportunity to get more information on it, especially when it was a defaulted loan, that she did requested more information from Mr. Wilson, and would ask for an update on other loans and understood that there may be as many as 16 other loans that were in jeopardy of going into default, so she would like a report on those loans, and number two, she would like to know if by allowing the sale of the property if it would penalize the City in any way with HUD, and also would like to know what mechanisms were in place to prevent the principles from reforming and coming back in a certain period of time and reapplying for HUD loans, that she thought it was a serious matter, that she would release her tag but had concerns about it being on the agenda and not giving them the privilege of the tag, and Mayor White stated that they would respond to all three of her questions. Council Member Lawrence absent.

24. ORDINANCE authorizing sale of Casa Real Apartments located at 215 West Little York, Houston, Texas, and authorizing release of City's Restrictive Covenants, Deed of Trust Lien and assignment of leases and rents in exchange for substantial payment to City - **DISTRICT B – JOHNSON** – was again before Council. All voting aye. Nays none. ORDINANCE 2006-0280 ADOPTED.

MATTERS TO BE PRESENTED BY COUNCIL MEMBERS

Council Member Lovell stated that she wanted to congratulate Mayor White on securing \$20 million in federal funding for public safety in the City, that she, like other Council Members, looked forward to added patrols in their neighborhoods and looked forward to going back to neighborhood policing where they could have officers that neighbors and groups could have interaction with, which she thought was the most effective way of cutting down crime; that she was a member of the Public Safety Committee and about 10 days ago they discussed the Red Light Camera RFP and there was a lot of work put in by the Houston Police Department and Public Works and there was also a lot of accusations that were flung around on the bidding process and she thought there was a lack of clarity, that she was going to ask Chairman Garcia to bring the issue of red light cameras to a special Public Safety Committee meeting to have a more in depth discussion on red light cameras and would ask the Mayor's office to look into the RFP process and to attend the committee meeting. Council Members Lawrence, Clutterbuck and Alvarado absent.

Council Members Lawrence, Clutterbuck, Wiseman, Khan and Berry absent.

Upon questions by Mayor White, Mr. Hall stated that the guidance they had given all departments generally was from the federal law, they did not have an option for hourly employees, whether or not they paid them overtime for over 40 hours, no exceptions and no excuses, obviously the adjustments that were made for non hourly employees were management prerogative in effect and they had said to other departments that they had to submit plans if they were to change or adjust the pay of exempt employees, and Mayor White stated that they would take a look at the memo from F&A and would get a response to Council Member Edwards. Council Members Lawrence, Clutterbuck and Wiseman absent.

Council Member Garcia stated that he supported Council Member Lovell request to have a Public Safety meeting on the red light camera issue and would work quickly to set a date, that

he would like the administration's support when they schedule the meeting that they have someone or several people from the administration who could speak about the process itself to address all the concerns that were brought up, that there were concerns about whether people got the right notice about the changing of a front license plate camera to a back license plate camera and that no one knew, that he had a concern about how the MWBE issue would be weighted or not in the process, so if the administration could have the right folks present to help him make sure that his colleagues on Council could have their questions addressed on the process, and Mayor White stated that they would do that. Council Members Lawrence, Clutterbuck and Wiseman absent.

Council Member Garcia stated that he wanted to commend Mr. Marcotte and Chief Trevino and representatives of Centerpoint, that they joined him last night at a lengthy discussion at the Hawthorne Civic Association meeting where last the week before there was a gas leak that had occurred as a result of a development project, that he wanted to thank them for being there and answering questions and making sure the community was comfortable, that he also wanted to thank Mr. Sid Wyse, who was the developer on the project for really taking ownership for what happened.
