Council Member Jackson stated that she has one comment. She knows that Mr. Liu is saying that the levels are percent lower or a point lower. She knows that she is not an expert on it but she had conversations before with Dean Bullard when they were dealing with the CES plant, Creosote and all the different environmental issues with the City of Houston. One of the things that he outlines that the TCQs recommandations or requirements is always below standard. When they have something that’s an environmental hazard, 9 times out of 10, it’s worse than what it really is because of the standard. The community knows this and that is why they are concerned. They want to make sure that they are doing more testing before they cap it. The request is basically a little more testing and she thinks that they owe that to the residents of Pleseantville who is overwhelmed with the enivornmental issues with the ports, the trucking companies out in their neighborhood. That’s their right and they should give them what they are asking. Understand her position and the residents position.

Mayor Pro Tem Martin stated that Council Member Jackson used a procedural motion to tag it. To delay it until tomorrow and they will take it up tomorrow. The City of Houston Public Works and the City of Houston Health Department have reviewed and approved the MSD applications. They will take it up tomorrow and they will see what happens.
