

ADOPT-A-GARDEN

Exciting opportunities now to adopt available community gardens!

Local groups, business, families and organizations can adopt a garden to grow vegetables and fruits for local projects or civic and charitable purposes that enhance the culture, health and well-being of the local community. Gardeners can take produce from their harvest for personal use as well. Our gardens are located in many of Houston's underserved communities and we believe community gardens not only improves the neighborhood, it helps the City become a beautiful and productive place to live for everyone!

HHD community garden adoption is easy. A garden administrator will identify which gardens are available and discuss in general what is expected of the adoption group. Gardeners must commit to providing the labor and attention required year-round to have a successful garden. HHD provides an orientation, limited use of on-site shed and tools, some seeds and limited soil if deemed necessary. Garden locations vary in size ranging from 4- 12 raised beds Garden adoption is secured when HHD sends signed & executed Memorandum of Understanding (MOU) back to adoption group.

Please contact Garden Administrator to discuss adopting a garden. HHDgardens@houstontx.gov
