Learn what the different color indicators mean for your health.

| Air Quality Index Values (ozone parts per billion) | | Levels of Health Concern |
|-------------------------------------------------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| >135 | Hazardous: | Health alert: everyone may experience more serious health effects |
| 116-135 | Very Unhealthy: | Health warnings of emergency conditions. The entire population is more likely to be affected. |
| 96-115 | Unhealthy: | Everyone may begin to experience health effects; members of sensitive groups may experience more serious health effects. |
| 77-95 | Warning: | Members of sensitive groups may experience health effects. The general public is not likely to be affected. |
| 61-76 | Moderate: | Air quality is acceptable; however, for some pollutants there may be a moderate health concern for a very small number of people who are unusually sensitive to air pollution. |
| 0-60 | Good: | Air quality is considered satisfactory, and air pollution poses little or no risk. |

Monitoring

The **Mobile Ambient Air Monitoring Laboratory (MAAML)** was deployed once in Sunnyside during January 2014. Pollutant levels detected are compared to the EPA's National Ambient Air Quality Standards (NAAQS). These standards are set for pollutants considered **harmful** to public health and the environment. **No** readings exceeded these standards. Ozone information for 2013 have been updated below.

Sunnyside Mobile Ambient Air Monitoring Laboratory (MAAML) deployments and Continuous Ambient Air Monitoring Stations

- The U. S. Environmental Protection Agency (EPA) sets the National Ambient Air Quality Standards (NAAQS).
- In the Houston region, during the 2011-2013 period, 15 of 20 Ozone active monitoring locations were in non compliance with the eight-hour Ozone NAAQS of 0.075 parts per million (ppm).
- In the surrounding area of the Sunnyside super neighborhood, three Ozone monitoring locations were in non compliance: Houston Monroe, Park Place, and Houston Croquet.

Source: Texas Commission on Environmental Quality (TCEQ) "Compliance with eight-hour Ozone standard" report of 2011-2013 three year average, in parts per billion (ppb) at http://www.tceq.state.tx.us/cgi-bin/compliance/monops/8hr_attainment.pl

Reporting an Environmental Violation

(What to expect)

Investigator return to make sure the violation has been resolved before closing the case. Example: Oil and contaminated soil collected. Clean soil brought in.

The Investigator makes contact to update you.

An Investigator contacts you within 24 hours for details.

Investigation is conducted. Air, water, and soil samples may be collected. Citations may be issued.

Call placed to 3-1-1 and a Service Request Number (SRN) is given to you.

Start- You observe a violation.
Example: Oil in ditches.

*** Have you had difficulties with 311 in the past?**
The City of Houston is actively working to improve its 311 service! You can help by:

- Making calls/reports and encourage your neighbors to do the same;
- Work WITH 311 and City investigators;
- Get your service request number. It'll help us track your case;
- FOLLOW UP if you don't hear back in a reasonable time.
