Bullying is an unwanted, aggressive behavior among school aged children. Bullying is generally repeated over time and involves a real or perceived power imbalance. Intentional and repeat incidences of bullying can result in long term impacts on physical, mental, and social functioning.

In 2013, 15.6% of boys and 23.7% of girls ages 14—18 years, reported being victims of at least one type of bullying. —YRBS

Youth Risk Behavior Surveillance System (YRBS)

Bullied on school property— YRBS defined bullying as when one or more students tease, threaten, spread rumors about, hit, shave or hurt another student over and over again.

Bullied on school property:

- Nationally — 19.6%
- Texas — 19.1%
- Houston — 9.1%

Electronically bullied— being bullied though email, chat rooms, instant messaging, websites, or texting.

Electronically bullied:

- Nationally — 14.8%
- Texas — 13.8%
- Houston — 9.1%

Why Bullying is an issue for schools?

- Almost 1 in 3 students has been bullied.
- Only 20-30% of students who are bullied tell adults about the bullying.
- Short and long-term consequences include academic difficulties, depression, and suicidal ideation and attempts.
Types of Bullying include:

- **Physical** — punching, shoving, hair-pulling, tripping
- **Verbal** — calling hurtful names, teasing, threatening
- **Indirect** — rejection, rumor spreading, humiliation, isolation, manipulation of friendships, exclusion
- **Electronic** — any kind of aggression perpetrated through technology

Youth who are bullied usually have:

- Lower peer status
- Lower social competence
- Negative community factors
- Negative school climate

Youth who bully other students have:

- Externalizing behavior
- Social competence challenges
- Academic challenges
- Negative attitudes toward others
- Family characterized by conflict

60% of males who bully in grades six through nine are approximately 3x as likely to be convicted of a least one crime as an adult.

Youth who are bullied usually have:

- Lower peer status
- Lower social competence
- Negative community factors
- Negative school climate

Youth who bully other students have:

- Externalizing behavior
- Social competence challenges
- Academic challenges
- Negative attitudes toward others
- Family characterized by conflict

**Recommendations:**

- Increase implementation of secondary and tertiary bullying prevention programs.
- Anti-bullying programs need to consider incorporating discussion of sexual harassment and homophobic language.
- Engage school personnel, parents and youth in discussions regarding bullying.
- Build safe environments at home, school, and in community settings.

**Related Policies and Policy Implications:**

Currently, there are no federal laws directly addressing bullying.

Forty-seven states have anti-bullying laws. Eighteen states include cyberbullying in their anti-bullying legislation.

HB 3226: Texas anti-bullying; healthy workplace bill.

HB 1942: Related to bullying in public schools. Chapter 21.451: Requires public school districts to provide staff development on bullying.

The Texas Education Code, Chapter 37 Section 37.001(a.7-a.8) requires that each school district’s Student Code of Conduct have a local policy that:

- prohibits bullying, harassment, and making hit lists and ensures that district employees enforce those prohibitions.
- provides methods and options for: managing students in the classroom and on school grounds, disciplining students, and preventing and intervening in student discipline problems.
- Texas law also covers cyberbullying.
