PARK SECTOR 2
PARK SECTOR 2 PRIORITIES

These priorities were developed by using condition assessment information from site visits, standard-based needs analysis (NRPA standards and data from The Trust for Public Land ParkScore™ Project), and public input via an online survey, park user interviews, community events and Capital Improvement Plan (CIP) meetings.

1. Revitalize existing parks
2. Develop Neighborhood connections to parks and trails
3. Develop partnerships with the school system and other entities
4. Acquire new parkland
5. Develop new park facilities
6. Preserve environmentally sensitive areas

RECOMMENDATIONS

The parks in Park Sector 2 that have the highest need for redevelopment are listed from greatest need to least need: Cooper Road Park, Curry Street Park, Milton Park, Croyden Gardens Park, and Squatty Lyons Park.

An additional 17.5 acres of parkland are needed in this Park Sector. Schools not participating in the SPARK School Park Program (Non-SPARK schools) should be explored as potential future partnerships for park space. There is also a high percentage of undeveloped land in this Park Sector which could be conserved for future park use. There is one utility corridor running north-south, south of Veterans Memorial Park and east of the Hardy Toll Road that could be explored for future trail development. As there are few portions of this Park Sector that are traversed by bayous, trail development should be explored along existing utility corridors. In addition, both the Antoine Corridor and the Harris County-Airline Improvement District Livable Center Studies have identified some areas of potential future connections to the current park system which should be explored to address future park space and trail connections.

This Park Sector is deficient in playgrounds, trails, volleyball courts, dog parks, skate parks, community centers, and pools. In the 2014 Online survey, the top four priorities of residents in Park Sector 2 when asked what recreational needs existed in their Neighborhood were: hike, bike and walk trails, upgraded community centers, playground areas, and picnic areas and pavilions. Other services and amenities that residents asked for in the write-in portion of the survey were: a swimming pool at Melrose Park, Zumba and aerobics classes, spraygrounds, walking trails, natural areas, fitness and nutrition programs, swim lessons, dance and theater programs, and senior programming.

As there is little redevelopment occurring in this Park Sector, although some is anticipated close to I-610 and along the light rail line, this Park Sector should be targeted for CIP and bond funds for future development and land acquisition. In addition, because 72% of the population in this Park Sector has low to moderate incomes, there is an opportunity to pursue Community Development Block Grant (CDBG) funds. Because of the health profile (obesity, 35.6%, and diabetes, 16.8%, levels higher than the city as a whole of 30.8% and 11.4% respectively) of this Park Sector, partnerships focused on increasing physical activity levels and programming for healthy living should be explored.

PARK SERVICE AREAS

The Park Service Area map was produced using data provided by the Trust for Public Land ParkScore™ Project to identify areas of park need. The green areas represent a ½ mile service area of public parks (city or county) and SPARK Parks (school parks open to the public after school) or other publicly accessible non-HPARD Parks.

The orange and red represent areas where there is not access to a park within a ½ mile. The degree of need (red is very high need and orange is high need) is based on population density, household income (less than $35,000), and presence of youth (19 yrs or younger). The office and industrial land uses are represented in gray, to specifically highlight residential and commercial areas of need. Approximately 40% of the area in this Park Sector is in need of parkland accessible within a ½ mile, as compared to the 45% of the population of the city of Houston who need park access. Non-SPARK schools are indicated on the map as black flags to explore as potential future partnerships for park space.

PARK SECTOR FACTS

• This Park Sector contains 743 acres of parkland (Harris County, HPARD and other providers). Of the 13,166 acres in this Park Sector, 6% of this acreage is parkland.
• There are approximately 100,000 residents. Over 81% of the population is Hispanic or Latino (higher than the City of Houston at 44%).
• Growth for this Park Sector is expected along the light rail and closest to 610 freeway.
• An additional 17.5 acres of parkland are needed in Sector 2. This is based on the current population (2010 US Census) of the Park Sector and needs assessment completed for Pocket, Neighborhood and Community parks (number of acres per 1,000 people).
• There is a total of 8 miles of existing trails serving this Park Sector.
• H-GAC population projections estimate that this area will add over 10,000 residents by 2040. To meet the parkland needs for the estimated 2040 population an additional 11 acres of parkland will be needed.

NEEDS ASSESSMENT FOR AMENITIES IN PARK SECTOR

The table below shows the total existing amenities (including, HPARD, County and SPARK School Parks) as of 2015, the target goal per amenity, and the amenities needed based on population standards for each amenity using 2010 US Census Population. The last row shows the estimated number of amenities needed based on the H-GAC population projections for 2040 and standards used in the 2007 Parks Master Plan.

GUIDE FOR ESTIMATED COST OF NEW AMENITIES, PARKLAND, AMENITY RENOVATIONS AND OPERATION AND MAINTENANCE FOR PARK SECTOR

The table below contains costs estimates (in 2015 dollars) based on the needs assessment using 2010 US Census population and population projections provided by H-GAC per Park Sector for 2040, for both amenities and land in this Park Sector. In addition, the cost estimates (in 2015 dollars) for renovation of existing facilities and operation and maintenance are listed. A general explanation of each figure and its source is listed below:

1. Cost of New System Amenities: This is the estimated cost for amenities based on the needs assessment above. Costs are estimated for 2015 and 2040 based on costs of 2014 HPARD projects. These costs are a guide and do not include site specific constraints such as utility extensions, flood mitigation or the purchase of and if expansion of the park was needed for these amenities.

2. Cost of Park Land: This is the land needed to meet the parkland standards for 2015 and 2040 based on the 2010 US Census and the H-GAC estimated population projections respectively. Land costs are based on land values by Park Sector, provided by H-GAC, from 2014 HCAD values for properties greater than 5,000 sq ft in size and with no structures.

3. Cost of HPARD Amenity Renovation: The 2015 cost estimate is based on the assessment that 30% of the existing facilities in this Park Sector need renovation. The 2040 cost estimate is based on the assessment that the remaining 2/3 of the facilities from 2015 and 30% of the new facilities will need renovation to meet the population growth. Costs are estimated for 2015 and 2040 based on costs of 2014 HPARD projects.

4. Annual Operation and Maintenance: This figure is based on the national average for parks and recreation operational spending amount ($63) per resident in 2013 according the Trust for Public Land publication “2014 City Park Facts.” Houston spent $29 per resident on parks and recreation per resident in 2013. This figure shows what the cost of spending this average amount per resident would be based on the current population and the projected population in 2040.

PARK SECTOR PROFILE 2

LOCATION AND POLITICAL BOUNDARIES
Park Sector 2 is located east of IH-45, north of IH-610, west of US-59, and south of Beltway 8
Park Sector Size: 13,166 acres or 20.6 square miles
Political Boundaries with Park Sector 2:
• Council Districts: B and H
• Super neighborhoods contained in this Park Sector: Northside/ Northline, Northside Village, Eastex- Jensen Area, IAH/ Airport Area, and Greater Greenspoint
• TIRZ: Greenspoint
• Management Districts: Greater Northside, Greater Greenspoint, and Aldine Public Improvement District.

**TABLE 1. PARK SECTOR 2 ETHNICITY (2010 CENSUS & CITY OF HOUSTON PLANNING AND DEVELOPMENT DEMOGRAPHIC DATA)**

This Park Sector contains about 4.6% of the population of Houston; the majority (81%) of the residents are Hispanic/Latino, followed by Non-Hispanic Blacks (11%) and Non-Hispanic Whites (7%). Most of the population lives in the eastern portion of the Park Sector closer to IH-45.

The age profile for this Park Sector shows that the percent of population under 19 (36%) is much higher than that of the rest of the city (28%). The percentage of adults 55+ years is lower (15%) than the rest of the City of Houston (19%). However, the distribution of age groups in this Park Sector generally mirrors the same pattern as the entire City of Houston. These demographic trends can help inform future programming and park improvements.

**TABLE 2. CITY OF HOUSTON VS. PARK SECTOR 2 AGE CITY OF HOUSTON ORTS WITH FURTHER BREAKDOWN FOR ALL PROGRAM AGE GROUPS**
**Housing**
There are a total of 30,859 housing units in this Park Sector. The percent of vacant housing in Park Sector 2 (10.5%) is lower than the vacancy rates for the entire city (12.3%). Home ownership for this Park Sector (40.3%) is just above the City of Houston’s home ownership rate (39.7%); similarly, the share of renters (49%) is just above that of the city’s as a whole (47.1%).

**Income**
The median household income for this Park Sector ($29,259) is much lower than that of the City of Houston ($48,322). In this Park Sector, 72% of the population is low to moderate income; therefore, this area could qualify for Community Development Block Grant (CDBG) funds.

**Educational Attainment**
Within Park Sector 2, the percent (6%) of individuals 25+ years of age with an Associate degree or a Bachelor’s degree or above is drastically lower than the relative percent for the entire City of Houston (32%). Conversely, the percentage of those within this park Park Sector without a high school degree (56%) is markedly higher than the same population for the City of Houston (25%).

![Educational Attainment Graph](image)

**Community Health**
The Health of Houston Survey 2010 data (aggregated by Park Sector by the Houston Department of Health and Human Services) shows that 35.6% of the adult population in this Park Sector is considered obese, as compared to 30.8% for the entire population of the City of Houston. The survey also showed that 16.8% of the adult population received a diagnosis of diabetes by a professional, which is above the level for the entire city (11.4%). In addition, this survey inquired about physical activity level and the results indicate that over 26% of the respondents in this Park Sector engage in a moderate physical activity for 5 or more days a week, which is lower than that of the entire city (32%). The national initiative, Healthy People 2020, has a goal to increase the amount of adults who engage in moderate physical activity for at least 5 days a week for 30 minutes to 47.9% of the population. The current national average of adults engaging in this level of aerobic activity is 43.5%. Finally, the survey shows that over a quarter of the population in this Park Sector (26.7%) does not engage in moderate physical activity at all, which is higher than the rate for the entire city (21.2%). As HPARD plans and prioritizes investments for future parks and trails, it should take into account the accessibility of parks, amenities provided and the impact to the health of the community in the long term. HPARD is an active participant in the Healthy Communities Initiative, Community Transformation Initiative, Healthy Kids Houston, and the Sustainable Communities Houston-Galveston Regional Plan, among other efforts. This involvement should continue with an emphasis on partnerships, measurable outcomes, and engagement with the community to encourage physical activity and help identify physical barriers to park access.

### LAND USE ANALYSIS

In Park Sector 2, while the acreage of residential, single-family parcels and multi-family (40.5%), is most common, there is a significant portion (16.1%) of the land classified as industrial. Undeveloped land accounts for over 14% of the acreage in this Park Sector. As expected, most of the commercial uses are along freeways or major thoroughfares; however, the industrial uses seem more evenly spread throughout the Park Sector.

**TABLE 4. LAND USE BY DESCRIPTION (2013 HCAD)**
HPARD PARKS AND TRAILS

The Houston Parks and Recreation Department (HPARD) operates 12 parks in the area accounting for 687.2 acres of parkland. Located in the Halls Bayou watershed, Keith-Wiess Park is operated in partnership with Harris County Flood Control District and serves as a small forest preserve, a recreational area and a natural detention area that helps to protect those in the watershed from fast traveling flood waters. Harris County operates 4 parks in this Park Sector, totaling 44.63 acres of parkland. Two of these parks, Mary Withers and Pinewood Village Parks, are owned by the City of Houston but maintained and operated by the County through a 30-year inter-local agreement. In addition, the Greenspoint District has developed two parks, City View Park (2.5 acres) and Buckboard Park (5 acres), and maintains open space that is set aside for a third park, Bradfield Park (4 acres).

TABLE 5. HPARD PARKS, ACREAGE, AND TRAILS INTERNAL TO HPARD PARKS, BAYOU AND URBAN/SHARED USE TRAILS IN PARK SECTOR 2

Inside HPARD parks, there are a total of 4.94 miles of trails. In addition, there are 1.44 miles of trails inside SPARK parks and 2 miles of trails along Halls Bayou between Jensen Drive and Keith-Wiess Park (passing through Bretshire, Mary Withers and Pinemont Village Parks) for a total of 8 miles of existing trails serving this Park Sector. Halls Bayou only touches the northeast corner of this Sector, so the majority of the Sector is not served by trails along it. There is one utility corridor running north-south, south of Veterans Memorial Park east of the Hardy Road which could be explored for future trail development. Hardy Toll Road could also present opportunities for bike travel from Downtown to Spring Creek. Less than a quarter mile to the south of this Park Sector, across from loop 610, is the Hunting Bayou trail. A connection to this trail system would provide needed access to trails in this area.

**TABLE 6. SPARK PARK ELEMENTARY, MIDDLE AND HIGH SCHOOLS FOR PARK SECTOR 2 BASED ON DATA PROVIDED ON 2011 BY THE SPARK PROGRAM**

*Acreage is overstated because it is based on the parcel corresponding to entire school and not the SPARK Park only.*
To determine level of service, the 2007 Master Plan outlined standard distances based on park classification as well as population. Analysis in this section will be done based on population (acres/1,000 people) as well as park accessibility within a one-half mile radius using data from the Trust for Public Land ParkScore™ Project. Figure 6 below shows the level of service (LOS) based on the 2007 HPARD recommended standards of a number of acres per 1,000 people using the 2010 Census population. According to the HPARD recommended standards per park type (2007 HPARD Master Plan Criteria Facility Needs): 0.005 acres/1,000 people for a Pocket Park, Park Sector 2 meets the standard. According to the HPARD recommended standards per park type (2007 HPARD Master Plan Criteria Facility Needs): 1.5 acres/1,000 people for a Community Park, Park Sector 2 also meets this standard. The analysis for level of service and needs is shown below.

17.52 acres of Neighborhood parkland are needed in this Park Sector.

To determine level of service, the 2007 Master Plan outlined standard distances based on park classification as well as population. Another way to measure the level of service provided by parks is by looking at a “walkable” distance (1/2 mile radius) from the park regardless of the size of this park. The Rice University Shell Center for Sustainability published the Houston Sustainable Development Indicators: A Comprehensive Development Review for Citizens, Analysts, and Decision Makers and used ¼ of a mile distance of persons living from a park as a sustainability indicator for quality of life and determined that 44% of residents have access to a public space (King 2012). The Trust for Public Land (TPL) ParkScore™ study mapped the park needs of the City of Houston based on accessibility by density, age, and income. The methodology used by Trust for Public Land (TPL) ParkScore™ Project factors in the accessibility to a public park within ½ mile considering freeways and major thoroughfares as barriers to park access. Trust for Public Land (TPL) ParkScore™ found that 45% of residents have access to public spaces (Trust for Public Land (TPL) 2012). The map was produced using data provided by Trust for Public Land (TPL) ParkScore™ Project. The areas in green in Figure 7 represent the area within ½ mile of existing parks not blocked by freeways or major roads. Roughly 40% of the live/play areas (residential= yellow and orange and some commercial= red) in this Park Sector are not served by a park, which is lower than that of the entire city (55%). This percentage was calculated by subtracting the areas served, industrial areas, and acreage of private parks from the total acreage of the Park Sector. The hatched areas touching the boundaries of the Park Sector correspond to the existing Greenspoint District parks: CityView Park, Buckboard Park and Bradfield Park. These parks serve the most northwestern portion of this Park Sector. The other hatched areas hatched outside the Park Sector are proposed parks (according to the Greens Bayou Corridor Coalition Parks (GBCC) and Trails Master Plan) along Greens Bayou. The hatched areas are not accounted in the percentage for the areas served at this time, so the service area percentage is underestimated.

AMENITIES AND SERVICES

This map shows some of the community services available in this area: community centers, health centers, transit centers, schools, libraries, YMCAs, and Boys and Girls Clubs. There are three community centers located in Park Sector 2: Clark, Melrose, and Shady Lane Community Centers. The Northside Health Center provides a variety of services: immunizations, STD services, TB services, family planning, benefits eligibility screening, Women, Infants and Children Program (WIC), pregnancy testing, speech and language therapy, cervical cancer screening, Hansen’s Disease clinic, and mammogram screenings.
### Amenity Level of Service

The 2007 HPARD standards by amenity have been applied to the amenities in Park Sector 2. The first column after the recommended HPARD standards indicates the level of service (LOS) accounting for HPARD facilities only, the total inventory standard accounts for facilities from all providers. Then, the standard for each amenity is compared to the 2010 Census population data for this Park Sector to determine if the standard has been met or if more amenities are needed. The last two columns show the number of facilities needed to meet the standard using HPARD inventory only and using all providers in the Park Sector. According to these recommended HPARD standards, Harris County and other providers are meeting the needs of the residents for picnic shelters, outdoor basketball courts, tennis courts, outdoor spraygrounds, ball fields and soccer fields. This Park Sector is deficient in playgrounds (2), trails (11 miles), volleyball courts (1), dog parks (1), skate parks (1), community centers (1), and pools (1). A groundbreaking for a 10-acre state-of-the-art skate park, Spring Skate Park, was held in January of 2013 and the facility opened in the Spring of 2014. This skate park meets the needs of the north Houston area. CityView Park offers a pavilion, and a garden and Buckboard Park offers a gazebo; both of these parks are maintained by the Greenspoint District.

TABLE 8. LEVEL OF SERVICE FOR AMENITIES IN PARK SECTOR 2

A negative number in the last two columns means there is a surplus, a positive number means there is a need.
Status of Projects (POS/CIP/CDBG/Grants)

- Keith-Wiess Park received funds to execute a project of which the scope of work includes: 3 new soccer fields, irrigation, water well, parking lot, field and parking lot lighting, electrical service, bleachers, and sidewalks. The work was completed in April 2013.

- Shady Lane Park received $1.5 million in CIP funds and other private and public grants for a major renovation. The scope of the work consists of demolishing of existing playground equipment, picnic tables, benches and concrete pads and replacing these with new grading, drainage, sidewalks, concrete bordering, playground, swings, picnic tables, grills, benches, decomposing granite pathways, boulder placement and outdoor exercise equipment. The existing picnic shelter plaza was expanded and water spray features were constructed. The work was finished in October of 2013.
