

# HOUSTON PARKS MASTER PLAN

## PHASE II

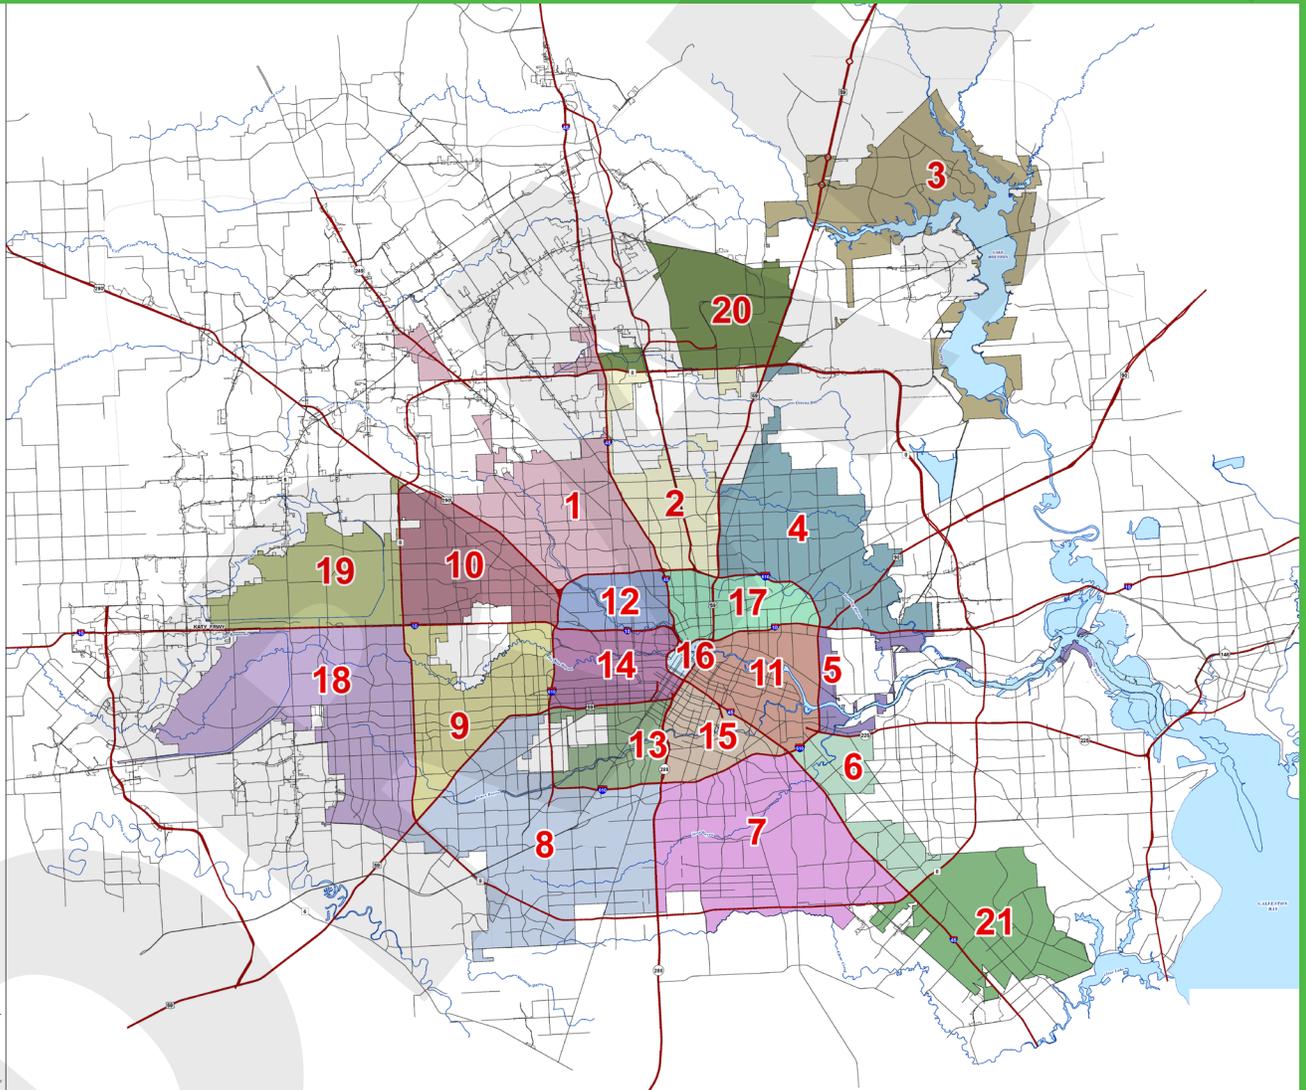

The Houston Parks and Recreation (HPARD) Parks Master Plan presents the vision of the residents of Houston and the goals, or Big Moves, to be made by the Department in the next 20 years. An online survey was conducted from March 2014 through July of 2014. Approximately 1,800 responses were received. Two-thirds of survey respondents identified connecting their neighborhood to hike, bike, and walk trails and revitalizing existing parks as their highest budgetary priority for HPARD.

HPARD performed a year-long initial assessment of each Park Sector in the City with support from the Planning and Development, the Health and Human Services and the Housing and Community Development Departments of the City of Houston, The Houston Parks Board, The Houston-Galveston Area Council and the Center for Sustainability at Rice University. Volunteer Interns from St. Thomas University, Texas A&M University, Lone Star College, and Texas Southern University were indispensable in this effort. Maps of areas of park need were created using data provided by the Trust for Public Land ParkScore™ Project; HPARD continues to partner with the Trust for Public Land to improve the methodology and assess park needs specific to Houston.

## PARK SECTOR 15:

This Park Sector contains 315 acres of park land (Harris County, HPARD & other providers). There are approximately 60,000 residents, 60% are African-American and there is a higher percentage of youth (19 yrs or younger) as compared to the city as a whole. There is a high incidence of obesity among adults (43%) as compared to the city as a whole (31%). Growth for this Sector is expected along the light rail and in the areas closest to Downtown. The map shows high need along Cullen Boulevard in the southern portion of the Park Sector and close to Telephone Road and I-610 where there is multi-family development.

The map above was produced using data provided by the Trust for Public Land ParkScore™ Project to show areas of park need. The green areas represent a ½ mile service area of public parks (city or county) and SPARK Parks (school parks open to the public after school) or other publicly accessible non-HPARD Parks. The orange and red represent areas where there is not access to a park within ½ mile. The degree of need (red is very high need and orange is high need) is based on population density, household income (less than \$35,000), and presence of youth (19 yrs or younger). The office and industrial land uses are represented in grey, so as to specifically highlight residential and commercial areas of need. Approximately 21% of the area in this Park Sector is in need of park land accessible within ½ mile, as compared to the 55% of the population of the City of Houston who need park access.

### OPPORTUNITIES

Non-SPARK schools are indicated on the map as black flags to explore as potential future partnerships for park space. This Park Sector has a total of 8.6 miles of trails. It is projected that there will be a total of 19 miles of trails along Brays Bayou once BG2020 is completed. There are areas of need that are primarily comprised of low-density single family housing where there is undeveloped land that could be conserved for future park use.

### PARK AMENITIES

The table below shows the total existing amenities (including, HPARD, County, SPARK Parks and Private Parks), the target goal per amenity, and the amenities needed based on population standards for each amenity.

AMENITY	PLAYGROUNDS	PICNIC SHELTERS	TRAILS (MILES)	OUTDOOR BASKETBALL COURTS	TENNIS	VOLLEYBALL	DOG PARKS	SKATE PARKS	COMMUNITY CENTERS	SWIMMING POOLS	OUTDOOR SPRAYGROUNDS	BASEBALL (LIT & UNIT)	SOFTBALL (LIT & UNIT)	SOCCER (LIT & UNIT)
GOAL	19	9	13	16	19	2	1	1	3	3	1	3	2	6
EXISTING	19	9	13*	16	19	1	0	0	2	3	1	2	0	2
NEEDED	-	-	-	-	-	1	1	1	1	-	-	1	2	4

\*This number includes miles of trails currently along Brays Bayou under the Bayou Greenways Initiative, BG2020.
