

# PUBLIC HEARING REPORT

## F1: Aldine Westfield Road

**APPLICANT:** Harris County Engineering Department

**KEY MAP:** 292 H, M

**JURISDICTION:** Harris and Montgomery counties

**LAMBERT:** 5271, 5272

**DISTRICT/PRECINCT:**

Harris County Pct. 4  
Montgomery County Pct.3

### PROPOSAL:

The Harris County Engineering Department is requesting the deletion of the Major Thoroughfare Aldine Westfield Road from Riley Fuzzel Road to Spring Creek (Montgomery County line) on the Major Thoroughfare and Freeway Plan (MTFP). Additionally, the Planning and Development Department (P&D) is requesting to realign Aldine Westfield in Montgomery County to extend to Riley Fuzzel Road/ Grand Parkway north of Spring Creek consistent with Montgomery County's Thoroughfare Map.

### APPLICANT'S JUSTIFICATION and HISTORY:

This amendment was previously submitted by Harris County last year. This amendment was not promoted to the Planning Commission agenda because the application did not include an impact analysis of their amendment on the existing thoroughfare network in Montgomery County. The city required Harris County to coordinate with Montgomery County and assess the impacts prior to requesting an amendment this year.

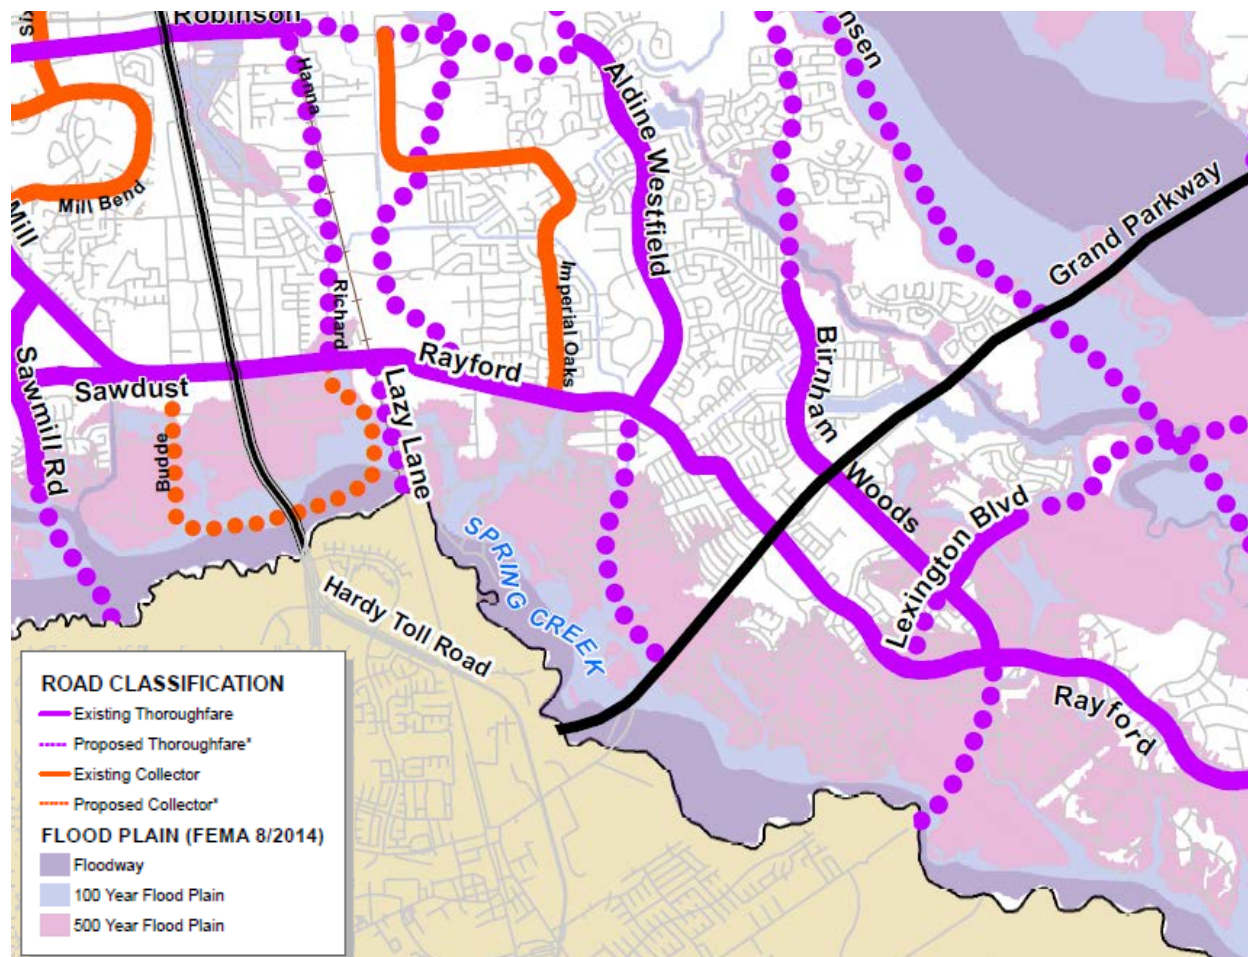

Montgomery County Commissioners' Court updated and adopted a new thoroughfare plan on January 26, 2016. Before this year, they showed the extension of Aldine Westfield Road from Spring Creek to the city of Conroe. They have since realigned Aldine Westfield Road north of Spring Creek to connect to the Grand Parkway westbound frontage road. The applicant states that this realignment in Montgomery County causes the primary reason for the deletion of Aldine Westfield Road from Riley Fuzzel to the Montgomery County line (Spring Creek) in Harris County. Secondly, the applicant states an additional reason to delete the corridor is that one parcel within this corridor is owned by Harris County Flood Control District (HCFCD). This parcel is impacted by a majority of this major thoroughfare's corridor alignment. This parcel may be used as a future regional detention pond, but the use has not been finalized. A third reason to delete the corridor is that the alignment impacts existing buildings on two parcels located along Riley Fuzzel.

With the existing alignment as shown on the MTFP, there is an approximate ½ mile offset between the north and south sections of Aldine Westfield along Riley Fuzzel. With this deletion/realignment, there will be an approximate 1.5 mile offset between the north and south sections of the major thoroughfare Aldine Westfield along Riley Fuzzel creating a safer intersection spacing.

This road corridor was first designated on the City's MTFP map in 1966 as a connector road between FM 1960 to Montgomery County. Its alignment been modified over the years. The most recent realignment came in 1985. This is approximately the same year that the Hardy Toll Road was finalized and was reflected on the MTFP map.

# PUBLIC HEARING REPORT

The proposed realignment of Aldine Westfield Road in Montgomery County preserve the mobility benefit of the roadway without requiring the extension of the roadway across the floodway and flood plain for Spring Creek. This realignment is consistent with the approved Thoroughfare Plan for Montgomery County.

2016 Montgomery County Thoroughfare Plan

## STAFF ANALYSIS:

### Population & Employment Projections:

A demographic analysis, using the Houston-Galveston Area Council (HGAC) projections, was conducted for the area surrounding the proposed Aldine Westfield realignment. Population in this area is forecast to grow by approximately 50 percent, from 34,000 in 2015 to over 52,000 in 2040. This population growth rate is comparable to the growth rate projected for the overall City of Houston ETJ over the same time period. While there is expected to be some employment growth from 1,600 jobs in 2015 to approximately 6,700 jobs by 2040, employment density in this area is forecast to remain very low. As the gap between population and employment becomes greater, this area will further develop as a suburban bedroom community.

# PUBLIC HEARING REPORT

Year	Population	Population Density (Persons/Acre)	% Change	Jobs	Job Density (Jobs/Acre)	% Change
2015	34,502	4.9	-	1,603	0.2	-
2020	47,488	6.8	37.6%	2,624	0.4	63.7%

Data represents population, jobs, and households in 10 Traffic Analysis Zones (TAZ) encompassing approximately 7,000 acres around the proposed amendment. Population projections do not include projections for group housing.

## Land Use and Platting Activity:

There are four parcels along the Aldine Westfield corridor that is proposed to be deleted within Harris County. Two properties are primarily for commercial use. One property is owned by HCFCD, and the fourth property is owned by Harris County. It is assumed that HCFCD will utilize these properties as a future regional detention basin. Platting activity in the adjoining area is identified in the table below.

Subdivision Name	PC Action Date	Land Use	Property Size (Acres)	Lots

# PUBLIC HEARING REPORT

## **Right-of-Way (ROW) Status:**

No ROW has currently been dedicated for the existing Aldine Westfield alignment or the proposed Aldine Westfield alignment.

## **Spacing:**

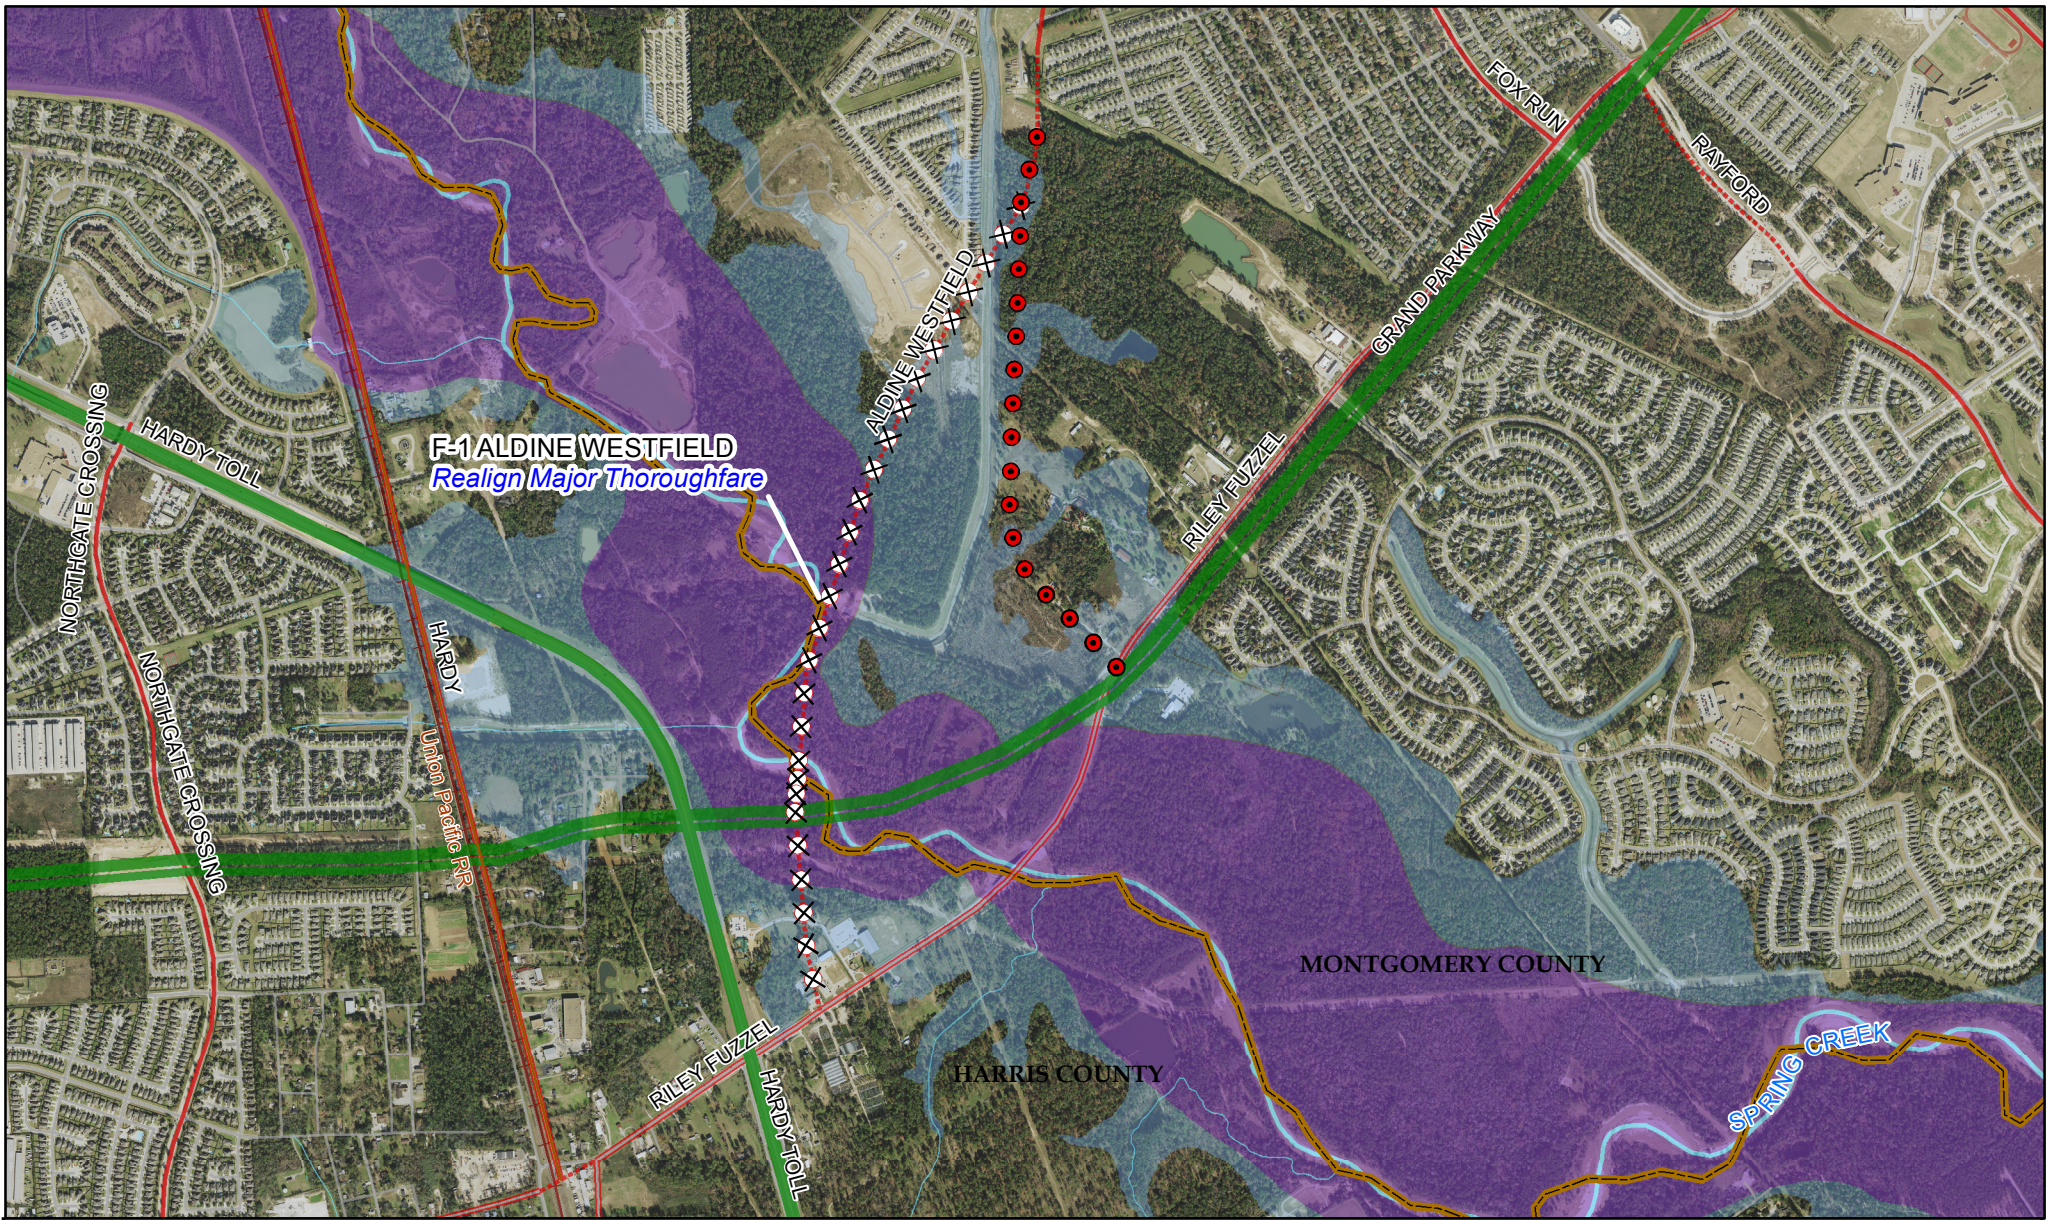

The realigned Aldine Westfield Road corridor will have two major highways in proximity of this alignment. The Hardy Toll Road is 0.8 mile to the west, and the Grand Parkway bisects the road corridor 0.30 mile north of Riley Fuzzel. Final engineering design for the Grand Parkway's ramp columns or foundation is unknown at this time. A future road overpass may be taken into account. The fact that this road would be proposed to be deleted will negate the need to accommodate a ramp.
