We are here!
Houston Drainage Studies

Houston Public Works is conducting drainage studies throughout the City. These studies focus on areas where flooding threatens homes, storm sewers need improvement, and channels, bayous, and land create unique challenges for local flooding.

The drainage studies will include an assessment of existing conditions and alternatives for improvements. Houston Public Works is working with both the Harris County Flood Control District and Harris County Engineering Department.

The City of Houston is requesting funding through the Texas General Land Office’s Community Development Block Grant Mitigation program. Requests for improvements will directly help the following areas:

- Fifth Ward
- Kashmere Gardens
- Sunnyside
- Aliiol Parks
- Braeburn Glen

Additionally, the City plans to partner with other agencies to seek funds for the following areas:
thank you!
