

APPEAL FORM

Questions for this promotional examination were taken solely from the source material listed in the Source Material List. Information contained in any other material will not be considered in determining the correct answer to any question.

Houston Fire Department

HFD Investigator 1/7/2015

You may only appeal **ONE** question per form.

For Question # 9 I would like the Test Review Committee to take the following action (please check one or explain in the space provided):

- Make A the only correct answer. Other (please explain below):
 Make B the only correct answer.
 Make C the only correct answer.

Consider the following as correct answers (circle the answers you feel are correct):

A B C

- Give all applicants credit
 Remove the question from the exam.

Explanation: Please provide a detailed explanation of your appeal / rebuttal. **DO NOT WRITE THE TEST QUESTION ON THIS FORM.** Print/ Write legibly.

Flashover
In flash over the fire progresses from fuel - controlled burning to ventilation - controlled.

in page 37 in table (3-5) lists several of the variables that determine whether and how fast flashover will occur.
all three answers are listed as factors that ~~not~~ influence flashover.

All three answers affect the fire ability to flashover in one way or another. The amount of fuel is just as important with no fuel or small amounts of fuel the fire cannot create enough heat radiate, radiant heat and convected heat to imping on the other combustible (fuel) items.
