

# BARC Animal Shelter & Adoptions

## CODE RED - DOG & CAT

3/13/2024 5:15:07AM

This report is intended for currently approved rescue partners and fosters.

\*These pets have been identified as the MOST URGENT and can be potentially euthanized at any time during the day should we reach capacity.

\*This list will serve as the final notice for this pet.

If you are an interested adopter please visit our website at [https://www.houstontx.gov/barc/adopt\\_a\\_pet.html](https://www.houstontx.gov/barc/adopt_a_pet.html) for more information on adopting.

### DOG

Animal ID	Name	DueOut Date	Kennel No	Weight	Condition	Days in Shelter
A1927544	HOWIE	03/12/2024	DA22	25.40	BEHAVIOR	4
Description: (Intact male) 2 YEARS, TRICOLOR, AUST CATTLE DOG MIX DOG						
FELV/ FIV or HW Status:		NAD				
Outcome Request:			Reason: BEH SEVERE			

#### Eval. Notes:

##### INTAKE

03/09/24 08:55 owner moved out a week ago and left the dog in the yard

##### BEHAVIOR NOTE

Dog has tense body, dilated eyes, and tucked tail while on leash. When AEO placed a muzzle using a second leash, dog started to thrash, vocalize, and attempted to alligator roll. Unable to complete full work up at this time.

##### INTAKE

During workup, dog had hackles up with stiff stail and low growling. Able to workup with ACT muzzling and restraining.

##### BEHAVIOR NOTE

Dog sitting towards front of kennel, giving hard stare. Dog walked on semi loose leash and quickly went into new kennel.

##### BEHAVIOR NOTE

Approaching kennel dog is standing in front of kenenl, took a few treats. As i started to place leash dog flinched and slowly walked out , walked slolwy with tail tucked to next kennel

\*\*STRAY DOG IMPOUNDED WHILE CARRYING OUT A BITE CASE INVESTIGATIONPLEASE SEE ACTIVITY A24-018341\*\*

**BEHAVIOR NOTE**

Dog was very timid upon approach. When dog was presented with leash, it avoided my and kept a tucked tail. When leashed, the dog maintained a tight leash. At times it tugged back andfroze. Had to muzzle and carry].

**BEHAVIOR NOTE**

Approaching kennel dog was standing in front of door, tail down. Dog took chicken on floor , walked very slow on leash but would follow treat trail.

**BEHAVIOR NOTE**

sylvester greeted me at the front of the kennel cowering and a tucked tail. once on the leash , he began walking very slowly with his tail tucked.

**BEHAVIOR NOTE**

dog greetred me with a loose body and a relaxed face. whne coming ouyt of kennel,. he was hesitant at firsyt, but he did come out on hiw own. maintained a loose leash and maintained a relaxed body outside. Dog remains asleep in kennel.

**BEHAVIOR NOTE**

Approaching kennel, Piper comes to me with a swaying tail and low ears as I babytalk to her. Noticed that Piper held a wagging tail and followed me as I offered treats to leash her.

**BEHAVIOR NOTE**

In kennel, Piper is very quiet and when going to leahs she walks up with a wagging tail and slight open mouth smile. I leash and she walks close to me and very loose, she will speed up but if I maintain a slower pace she will as well. In runs she goes and does her business and will return to run gate in a seated position and wait patiently. When returning she walks loosely and remains quiet in her kennel.

**BEHAVIOR NOTE**

Approaching kennel, dog has relaxed body language. I opened the kennel leashing her and she walked out the kennel. She walked loosely as I took her to an outside run and she pottied once I released her inside. When retrieving, she was more excited and jumpy as I leashed her. She stopped jumping as we started walking and walked on a semi-loose lead.

**BEHAVIOR NOTE**

Behavior has stayed the same. Relaxed body language when approaching to leash, NOt interested in treats even with offered meaty treats. Did accept one treat and took very lightly from my hand and then dropped it. Walks on a loose leash at side to runs. When coming back to retrieve her she did begin to bark as I got closer jumping up on gate. I open run slightly and leash her. Began to jump up on me and running around me but settled quickly. I offered her pets and she leaned into them. Walked into kennel with no issues. QUIet througout the day lounging on bedding. seems to really enjoy lounging on outside portion of kennel as well

**Eval. Notes:**

**INTAKE**

Timid

**BEHAVIOR NOTE**

Dog was tense in the kennel with whale eyes, not taking treats, tail close to self, and cowering. He was avoiding the leash but walking around me. Leashed and he walked out on a forward leash, tense body, tail out straight. He walked into the kennel when I did.

**BEHAVIOR NOTE**

Very wiggly and playful. Loves plushies, rawhide, and several other enrichment items. Bouncy ears, loose body and soft face, while walking on leash.

FRIENDLY

**BEHAVIOR NOTE**

When I approached to her kennel, Rihanna was wagging her short tail with smile mouth. I leash her up to go outside, she refuse takes treats and pull the leash very hard. she was barking to the dogs so I just walks with her and wait she do the potty. Then take her to the new kennel.

**BEHAVIOR NOTE**

03/08/24 13:55 Very wiggly in kennel, standing up on hind legs. I pointed down and waited for her to have all four paws on floor to leash. Once kennel door was opened, she pulled very hard down row, clawing at ground and chest nearly touching floor. Placed in outside run and whenever she saw staff interacting with other dogs (leash and take out of run) she was forward barking and growling at dogs.

**BEHAVIOR NOTE**

Approaching kennel, dog greeted me with a wiggly body and open mouth smile. I slowly opened the door and she walked into my leash. On the leash she walked on a super tight leash, pulling me with her. I placed her in runs and she quickly did her business. Once I went back outside, she quickly ran to the front of the door with wiggly body. I easily leashed her, she walked on a tight leash and was pulling less.

**BEHAVIOR NOTE**

Dog was laying down in the kennel and got up when I went in. She was open mouth, tippy tapping, and standing to the side. I leashed and she walked on a very foward leash. Tossed treats and wasnt going for em.

**BEHAVIOR NOTE**

Dog presented a loose body, waggy tail and dialated eyes. whne walkig, dog tends to pull hard on leash and tens to ignore treats. Dog seems stiff on leash and body is wiggly. seems to be over aroused.

**BEHAVIOR NOTE**

While dog is in kennel dog is facing back corner wall, head is pressing on the corner, avoiding eye contact. Does not eat treats nor food while i am in sight once i leave and come back dog food is not there but he is facing corner.

**BEHAVIOR NOTE**

Dog was in the back of the kennel with a tense body, facing the wall. I tossed treats but he only looked over at them and pushed his head back into the wall. I waited till he looked at me to leash and muzzle/ carry to him.

**BEHAVIOR NOTE**

Dog seemed tense and avoided eye contact and hid in corner. Had a difficult time trying to bring dog outside. couldnt muzzle because the head position. tried throwing treatsand dog continued to tremble and hide on the corner. resorted to muzle and carry.

03/07/24 14:31 #100 Garcia Timid...NG

**BEHAVIOR NOTE**

Approaching kennel, dog is showing timid body language. Cowering in the corner of the kennel avoiding eye contact. I opened the kennel and entered, he got closer to the kennel wall avoiding the leash. Once the leash was on him he walked out the kennel at a quick pace on the way to the next kennel. He began to defecate himself once we were near the next kennel. I opened the kennel and he went in on his own then I unleashed him.

**BEHAVIOR NOTE**

Cowering in kennel facing wall, did not take treats. When I placed leash dog walked slowly out of kennel he did jerk a few times on leash and was having a BM while walking

**BEHAVIOR NOTE**

Canine remains very calm and quiet in kennel, sleeping very quietly on her blanket with her feet tucked and tail wrapped around her. When opening kennel door she stands and comes to me with a loose wiggly body and a softly wagging tail. When walking she keeps her body relaxed and walks with a loose leash all the way to runs and back, taking treats with a soft mouth.

**BEHAVIOR NOTE**

While in her kennel, Stormy is very vocal. Placing her on adopt eval to see if covering her kennel keeps her any calmer.

**BEHAVIOR NOTE**

loose wiggly body, soft mouth when taking treats, gentle loose wagging tail

**BEHAVIOR NOTE**

Throughout the day, Stormy was calm and quiet in her kennel. Because we were closed, I left her kennel uncovered to see how she did. She was not vocal today and seems to be getting used to her kennel.

**BEHAVIOR NOTE**

Dog was laying down in the kennel, got up with a wagging tail when I go to the kennel. Walked on a forward leash, open mouth, whiney outside and was running around.

**Eval. Notes:**

**BEHAVIOR NOTE**

Tensed body, whale eyes, hackles up. Walked out with his tail tucked in, lip licking. Followed into a new kennel, very flinchy when removing leash

**BEHAVIOR NOTE**

03/09/24 13:39 This morning, walked out of kennel with hackles raised, tail down. Kennel was clean from overnight. Once outside he pottied and back smoothed out and was relaxed, nudging my hand up and rubbing his head on my hand. However, his tail remained down and I then noticed that it was very limp and he was not able to lift it up as he pottied or when he wagged tail, so earlier observation may not have been behavior-related. Very treat motivated; eyes followed my hand with treats but then just stuck his snout in my treat bag rather than wait for treats to drop.

Animal ID	Name	DueOut Date	Kennel No	Weight	Condition	Days in Shelter

Description: (Intact male) 7 YEARS, GRAY / WHITE, STAFFORDSHIRE MIX DOG						
FELV/ FIV or HW Status:		HIGHPOSITIVE				
Outcome Request:			Reason: COND SEVER			

**Eval. Notes:**

**BEHAVIOR NOTE**

Greeted at kennel door with swaying tail and loose body. Was eager to come out of kennel and nudging at door. When I leashed him, he pulled on the leash to get down the row. Another dog barked at him through the kennel and he pulled towards their kennel with a forward stance. However, once he reached the dogs door and sniffed at him, he loosened and started wagging his tail. In surgery, was very wiggly and was a little difficult to examine just because he kept doing semi jumps and giving kisses. Sat and gave me his paw. Did get a little mouthy when I touched his leg again but had a wiggly loose body as if he thought it was a game.

**BEHAVIOR NOTE**

resting when I approached and tossed kibble. got up to greet with a neutral body and low slow tail wag. squatted down to offer more kibble and opened gate. focused on treats and before slowly reaching the side of his neck to verify his ID he snapped at my hand and body went tense. I tossed more kibble, he responded and I closed gate.

**BEHAVIOR NOTE**

Was brought over as move adopt in the am. Was left in the outside runs by another ACT when I came to leash him he greeted me with a loose body. Once leashed he walked to his kennel loosely. Once he was placed into kennel he started to peek on the side and began barking towards dog behind him and scratching the divider. Did this throughout the day. I offered him a rawhide yesterday but he would still go back to peeking through the side of the divider. Moved dog to a different kennel to see if it helps. Will continue to monitor behavior. 03/11/24 10:29

**BEHAVIOR NOTE**

After am cleaning noticed he would still bark and scratch and divider fighting with dog on opposite side. I covered kennel and offered a rawhide/pig ear along with enrichment for the day. Came back from lunch and he was the only dog in the row barking and scratching at divider. Hackles raised along with forward bark and body. Dog on opposite side was quiet and became timid due to Drogo's behavior towards her. 03/11/24 12:39

**BEHAVIOR NOTE**

approaching kennel, dog was tap dancing and had a waggy tail. when walking, dog pulled on leash constantly and ignored treats. still was at a high tail position and muscle stiffness. Dog resisted going back inside its kennel, Had to throw treats but little to no affect. had to muzzle and push in kennel.

**Eval. Notes:**

**MEDICAL CONSULT**

03/09/24 17:03 Spoke w/ citizen regarding eye. no tx needed. states that she will be taking p to full service vet for exam. I informed her if they rx meds, we could possibly fill those for her here based on med records and if we carry item in shelter. citizen understood. wants to continue w/ adoption.

**MEDICAL CONSULT**

Spoke with Ms Linda regarding parvo dx and treatment available through barc. Adopter notes she is unable to come up here, due to living far away. Is worried about costs related to treatment at full service vet but understands we do not reimburse those costs. Will talk it over with her husband and get back with us.

02/23/24 13:10 very timid

**BEHAVIOR NOTE**

Very quiet in surgery kennel throughout the day. When going to pre-med, I opened the door and she remained laying down with soft eyes. I started petting her and she leaned in to my hand. Did not require muzzle/ restraint for sedation poke.

Patrol neighborhood, school and bayou

**BEHAVIOR NOTE**

Pistachio has a loose wiggly body and tail walks well on loose leash.

**BEHAVIOR NOTE**

When I approached Pistachio's kennel, he had a loose, open mouth, tappy feet, and a loose, wiggly body. I leashed him and he walked outside on a loose leash. Once outside, he ran around in his outdoor run with a loose, wiggly body. I leashed him and walked him back inside on a loose leash. He walked back into his kennel on his own.

**Eval. Notes:**

**BEHAVIOR NOTE**

dog was vocal in a high pitch during am feeding and cleaning. as we began our walk dog walked on a forward tight leash while ignoring trail of treats. once in outdoor kennel dog was vocal/yelling. walked back inside on a loose leash. once back in his indoor kennel he began digging and throwing his water bowl. decided to put a bucket and attach to kennel wall to prevent anymore spilling.

**BEHAVIOR NOTE**

In kennel, Cosmo presents with dialated pupils and sligth vocalization during a.m. feed, when walking otehr dogs Cosmo would begin to vocalize in a high pitch whine. I leashed and he walked loosely outside but when outside in runs he would begin to whine again, I leashed to come back in and he walke dloosely, immediatel;y when he was placed in his kennel he resumed whining in a high pitch then turning this into a loud pitch bark.

**BEHAVIOR NOTE**

when approaching kennel cosmo is standing in front of kennel door, neutral body, easy to leash walks on a loose leash out to runs. in outside runs i pet him for a while before he went out to potty.

**BEHAVIOR NOTE**

In kennel, Cosmo is still displaying a high pitch whine and vocalization as he waits to go outside in a sitted position, In run he will walk around with a relaxed body but then begin to whine again, when he is put back into kennel he will immediately return to whining. (Cosmo walks well on a loose leash going outside and coming in)

Eval. Notes:

**BEHAVIOR NOTE**

Approaching kennel, Irina is jumping on the kennel door with a wiggly body, red eyes, and erect ears as well as had previously painted all over. I offered treats to leash her to which she ate readily and then she came out following them with a wiggly body on the way to and back from the runs. Noticed that whenever other dogs walked by she would jump up on the kennel door and vocalize a lot. Covered her kennel door and gave extra enrichment.

**BEHAVIOR NOTE**

dog had a very wiggly body, loose mouth and tongue, high wagging tail. once leashed dog walked on a loose leash while jumping around and on me. was able to redirect jumping by tossing down treats. once in outdoor kennel irina got the zoomies and began running up and down her kennel with her neighboring dogs. walked back inside on a loose leash and some hopping around. as we approached i tossed in some treats on her bed and she entered her kennel with no issues.

**BEHAVIOR NOTE**

as i approached dog had a wiggly body, high fast wagging tail and loose open mouth and tongue. once leashed dog walked on a loose leash while following trail of treats and occasionally jumping around.

**BEHAVIOR NOTE**

Approaching kennel, Irina greeted me with a wiggly body, fast wagging tail, and open mouth smile. I opened the door and was able to easily leash her. She walked out super excited, started to occasionally jump with open mouth smile. On the leash, she walked loosely and occasionally started to jump again. I placed her in runs and she immediately went to greet her neighbors and started to offer play bows through the fence. Coming back inside she had a more relaxed body, she was walking slowly with open mouth smile and slow wagging tail.

**BEHAVIOR NOTE**

In kennel, Irina vocalizes as people walk by (costumers) and other dogs and does not allow redirection while doing this. I leash her and she walks loosely and wiggly with a wagging tail out top the runs. When in runs she was slightly vocal but would offer play bows to the dogs next to her.

**BEHAVIOR NOTE**

Irina presented a wiggly body, high fast wagging tail, and loose open mouth while jumping on kennel door. once leashed walked on a loose leash while jumping around but was able to redirect jumping with treats. maintained same body language while heading in and out of south building.,

**BEHAVIOR NOTE**

vocal in kennel during am feeding and cleaning while jumping on kennel door. once leashed dog walked on a loose leash while jumping on and around me. was able to redirect jumping by tossing down treats. once in outdoor kennel dog became vocal while running up and down her kennel.

**BEHAVIOR NOTE**

In kennel, Irina is still vocalizing/ growling whilst jumping on her kennel door at passerbys. when I approach she has a wiggly body and I leash as she begins to walk semi-loosely outside but was somewhat jumpy but could be redirected. Outside she did begin to vocalize at other dogs passing by. She is in her coveerd kennel but has been trying to pull cover off.

**BEHAVIOR NOTE**

Jumping up onto kennel door as I approach, barking out. tossed treats into kennel to lower and leash, on leash she is very jumpy, wiggly body and walks on a semi tight leash from being excited but will redierct and follow treat trail.

**BEHAVIOR NOTE**

Approaching kennel, Irina had painted in her kennel overnight, and was jumping on her kennel door vocalizing. I went to place leash and she was jumpy but could be redirected with treats. Walking back to her kennel she held a tight leash and was still jumpy but could be redirected when jumping. In her kennel seh became vocal and would vocalize as other dogs/people walked by her kennel.

**Eval. Notes:**

**BEHAVIOR NOTE**

When I approached kennel to leash for surgery Trevor was laying on his bed with his head down . I opened the kennel door and he waited to be leashed. She walked out and greeted the dog next to him through the kennel door with a loose body, wagging tail and a play bow. I redirected him with a couple treats and he loose leash walked outside. He urinated and defecated outside immediatley. His kennel was clean in South. He stepped confidently on the scale and waited for me to get his weight. There was another dog waiting to get weighed and he continued to have a loose body, relaxed face, slow wagging tail. He walked into surgery with a loose leash. He stepped right up into the kennel as soon as I opened it. Despite the other dogs barking, he has stayed quiet in kennel.
