### CAT

Animal ID	Name	DueOut Date	Kennel No	Weight (lb)	Condition	Days in Shelter
A1869729		3/20/2023	CATA12	8.5	OTHER	1

Description: (spayed female) 8 YRS, TAB CALICO, DOMESTIC MH MIX CAT

FELV/ FIV Status: NEG

#### Evaluation Notes:

**BEHAVIOR NOTE:** feline was soft meowing and gently rubbing against cage. During workup became a little feisty(after meds injection), but calmed down moments after and allowed blood to be drawn. once back in kennel she began rubbing against cage and soft meowing again.

Animal ID	Name	DueOut Date	Kennel No	Weight (lb)	Condition	Days in Shelter
A1869763		3/20/2023	CATB06	11.0	BEHAVIOR	1

Description: (unknown sex) 1 YRS, BLACK, DOMESTIC SH MIX CAT

FELV/ FIV Status: Not tested

#### Evaluation Notes:

**BEHAVIOR NOTE:** Cat was sitting in calm down box when I approached the kennel. Had tense body, dilated eyes, and had his tail tucked tightly against his body. I slowly offered my hand out to him which he came up close and sniffed it before he started to low growl. I offered some wet food and he swipped at the plate. I closed the calmdown box and moved him to a larger kennel to help him calm down.

Later in the afternoon, the cat was sitting in his litter box with slightly relaxed body but tensed up when I opened the cage door. He had airplane ears and started to low growl. I attempted to scarn him adn he tried to bite the microchip scanner.
