An Equitable Houston That Works For Everyone

For Houston to be truly great, we cannot be two cities in one: one of haves, and one of have-nots. All of Houston's neighborhoods should be vibrant communities of opportunity.

That’s why on April 17, 2017, I announced the creation of Houston’s Complete Communities program, and selected Acres Home, Gulfton, Second Ward, Near Northside and Third Ward as the first Complete Communities neighborhoods. These five neighborhoods – and frankly, too many others in Houston – have been ignored for far too long. The significant challenges facing these neighborhoods can only be solved through a focused, community-led effort like Complete Communities, with the City acting as a committed neighborhood partner.

Every neighborhood is unique, but there are common elements we all look for in the place we live: a mix of quality and affordable home choices, job opportunities, and quality retail; good parks and schools; and reliable transportation options. We all deserve freedom from overgrown, weeded or abandoned lots, poor drainage, failing infrastructure, and crime. Each Houstonian should feel that his or her neighborhood matters, and that the private and public sectors support its growth and success.

To achieve this goal, City departments have been working closely with community members and outside partners to find solutions and achieve transformational change. We have listened to the community. This plan is the result of these conversations and the first step toward a new future for these neighborhoods.

The Complete Communities program will attract more partners and resources toward targeted areas in a focused way, enabling more livable communities. I expect City departments to work alongside private and non-profit organizations, as well as local residents and businesses, to raise the bar in each neighborhood.

This is just the beginning. The five pilot communities have diverse demographic and physical characteristics, and a base level of community activism, making them ideal testing grounds for this new program. After we see real and sustainable change in these five areas, I am committed to turning to the next set of neighborhoods to create transformational change in them, too.

The Complete Communities program is the embodiment of my vision for a more equitable Houston. I am committed to rebuilding neighborhoods that have been underserved and under-resourced for decades. All Houstonians deserve to live in neighborhoods that support their dreams.

— Mayor Sylvester Turner

What is a Complete Community?

A sustainable community with . . .
- Strong community partners
- Civic engagement
- Community buy in

An affordable community with . . .
- Diversity of income
- No concentrated poverty
- A strong base of homeowners
- Quality rental units
- Energy efficient homes

A healthy community with . . .
- A quality grocery store
- Access to quality health care
- Parks
- Urban gardens or farms

A safe community with . . .
- Low crime
- Low rates of automobile crashes
- No unsafe environmental hazards
- Safe places for residents to walk, run, bicycle, and recreate

An economically strong community with . . .
- Opportunities for upward mobility
- Quality and diverse retail
- Quality jobs within or easily accessible from the community
- Thriving small businesses
- Strong city tax revenues to pay for municipal services

A community with quality schools including . . .
- Highly rated elementary, middle and high schools
- Easy access to high quality and affordable early childcare
- Access to quality vocational schools, community colleges

A community with good infrastructure including . . .
- Complete streets including sidewalks, bike paths, and accessible transit stops
- Utility infrastructure
- Proper lighting

A connected community with . . .
- Access to broadband internet connectivity
- Quality public transit or other affordable transportation options
- Good roads connecting to other major job centers and central business districts
- Strong community organizations that connect residents with each other and to others throughout the city

A beautiful and interesting community with . . .
- Street trees
- Public art
- Public spaces
- Preservation of historic neighborhoods

A resilient community with . . .
- Flood protection
- Good drainage
- Community and public services
In April of 2017, Mayor Sylvester Turner announced the kick-off of the Complete Communities initiative. Mayor Turner noted:

Complete Communities is about improving neighborhoods so that all of Houston’s residents and business owners can have access to quality services and amenities. It’s about working closely with the residents of communities that haven’t reached their full potential, understanding their strengths and opportunities, and collaborating with partners across the city to strengthen them. While working to improve these communities, we are also working to ensure existing residents can stay in homes that remain affordable.

The Complete Communities initiative was established to be collaborative, impactful, and transformative. The initiative has been guided by an Advisory Committee that met for the first time in January of 2017, and that has continued to meet regularly. The committee is comprised of 26 community leaders and advocates with a balanced perspective ranging from city-wide to neighborhood specific knowledge and engagement. The committee serves as a sounding board whose members are ambassadors for the effort and who have provided connections to residents and businesses in the selected neighborhoods. With support from the Complete Communities Advisory Committee a working definition of a complete community was established to identify the qualities that lead to a thriving neighborhood (see opposite page, left).

The five Houston neighborhoods selected to participate in the pilot initiative—Acres Home, Gulfton, Near Northside, Second Ward, and Third Ward—have very different strengths and challenges. As a result, stakeholders in each neighborhood developed a vision that represented their ideal of a complete community. This shared vision has guided the effort in each community.

Across the five neighborhoods 3,500 people shared their insights, values, and visions. More than 2,300 participants attended one of the fourteen public meetings, and nearly 1,200 leaders representing faith-based organizations, business owners, non-profit and community-based organizations, and civic, educational and institutional leaders attended one of hundreds of listening sessions with community planners. A Neighborhood Support Team, comprised of locally identified leaders, residents and allies, has guided each Complete Community effort.

Commitment to the Complete Communities initiative is far reaching. Over the last year the City has provided support through a team of dedicated staff across City departments, this support will continue. One-on-one meetings were held with over two-dozen City departments to present community-identified priorities and projects and establish mechanisms for implementation. In the coming years, the City and its staff will continue to work side-by-side with community leaders and allies to realize the vision for a complete community in each of the five neighborhoods.

After a year of engagement and collaboration with thousands of stakeholders, we have summarized what we heard in each of the five Complete Communities in an Action Plan. The Acres Home Action Plan outlines the vision, policies, goals and projects to realize a healthier, more resilient, prosperous, equitable, and complete future. This is Acres Home’s Plan.

EXECUTIVE SUMMARY

INTRODUCTION
The Acres Home Complete Communities Action Plan outlines the vision, policies, goals and projects that have been identified by hundreds of stakeholders over a six-month planning process that included four large public meetings and a community design workshop. Over 800 leaders, stakeholders, and partners attended these five public meetings, and provided valuable input and guidance. Overall, the goals and projects work towards a vision of a healthier, more resilient, prosperous, and equitable future for the community.

The Acres Home Complete Communities Action Plan has also been informed by one-on-one meetings with City departments and existing citywide planning efforts. The most important effort is Plan Houston, the city’s first general plan completed in 2015 that outlines a vision for Houston’s future and strategies to realize it. The Acres Home Action Plan supports and reinforces each of the 32 citywide goals identified in Plan Houston. The highest priorities identified by Acres Home stakeholders, that align with Plan Houston goals, include: ensuring access to affordable housing; a thriving, resilient, and diverse economy; nurturing safe and healthy neighborhoods; a respect for history; engaged and informed residents; and, sustaining quality infrastructure.

Other citywide planning efforts that shape decision-making and public investment are the annual Capital Improvement Plan, which outlines infrastructure priorities, the Houston Parks and Recreation Department’s 2015 Parks Master Plan, and the Houston Bike Plan, adopted in 2017. Each of these plans have also informed the Acres Home Action Plan.

The majority of the Acres Home Complete Community is part of a State designated Opportunity Zone, a new community development program established by Congress in the Tax Cuts and Jobs Act of 2017 to encourage long-term investments in low-income urban and rural communities.
COMPLETE COMMUNITIES PLANNING PROCESS
Each Complete Community is different. Some have engaged in substantial planning efforts, while others have not had plans developed for decades. As a result, the City designed and implemented planning processes that align with each community’s current position.

Each Complete Community effort began by conducting outreach and small group meetings with key leaders and stakeholders. Meetings in Acres Home were held with faith leaders, non-profit organizations, community-based organizations, business owners, and other civic, educational, and institutional leaders. Overall, 459 people were reached through this effort.

Following the outreach effort, an engagement plan was established for each Complete Community based on past planning efforts. The most recent plan developed for Acres Home was in 1999. As a result, four public meetings were scheduled to accomplish the following objectives: establish a vision; develop goals and projects; identify priorities and partners; and, to review the final Action Plan. In addition, a Community Design Workshop was held to further refine both the goals and projects.

The first Acres Home public meeting, held in October of 2017, focused on establishing a vision and goals; approximately 300 people attended this meeting. The second public meeting was held in November with 150 attendees and focused on defining projects that aligned with the vision and goals. The third public meeting worked to develop partners and priorities. The fourth meeting was a community design workshop, focused on further exploring key focus areas and projects in the community. Finally, the fifth public meeting was held in January of 2018, to review the draft of the final Action Plan. Overall, 800 people attended these meetings and worked together to develop the vision, goals, and projects and to align clear implementation strategies, priorities, timeframes, partners, and metrics to measure success.

The Action Plan has also been informed by one-on-one meetings with City department decision-makers. At these meetings projects and priorities identified by the community were presented, and mechanisms to achieve implementation identified.

Throughout the process, the Complete Communities initiative has been guided by the Acres Home Neighborhood Support Team, who met five times to provide their insight and suggestions. Projects are now being led by the “A-Team” who will oversee implementation and work directly with City staff to ensure that established benchmarks are achieved.
Executive Summary

The Acres Home Complete Community study area includes all of the Acres Home Super Neighborhood and the eastern portion of Greater Inwood. The Acres Home study area is located approximately ten miles northwest of downtown Houston, between Loop 610 and Beltway 8. The boundaries of the study area are approximately Interstate 45 and North Shepherd Drive to the east, Tidwell Road to the south, Antoine Drive to the west, and West Gulf Bank Road to the north.

The Acres Home study area is home to nearly 55,000 residents and grew in population by 9% between 2010 and 2015. Acres Home is a historically Black or African American neighborhood, although this is changing as more Hispanic or Latino residents move into the community. In 2015, the Black or African American population comprised the majority of the study area at 56%, followed by 35% Hispanic or Latino, 7% White, and 1% Asian.

Acres Home is one of Houston's most important neighborhoods, and it has a long and powerful history as one of the south's largest unincorporated black communities. The historic landmark in the neighborhood states “In 1910, land developer Alfred A. Wright platted the first of several subdivisions that eventually became the African American community of Acres Home.” The name of the neighborhood reflects the historical practice of selling home sites by the acre. The acre lots are still evident, providing sites large enough for small gardens and livestock. Acres Home once had its own school district, an organized volunteer fire department, and a black-owned bus company. In 1974, the area was annexed by the City of Houston, and for the first time received municipal water and sewer services. The legacy of self-sufficiency is as important today as it was in the early twentieth century, and is an asset to build on.

Today, the Acres Home study area is characterized by urban, suburban, and rural development patterns spread across the landscape in a patchwork. There are over 250 subdivisions in the area and substantial vacant land. In recent years, new development has been concentrated in the southern portion of the neighborhood. Overall, the area is rich with resources, such as the former Inwood golf course, White Oak Bayou, Bethune Academy, and many other assets, all of which can be enhanced through the Complete Communities initiative.

The Acres Home Complete Community Action Plan establishes as a set of actionable projects, policies and programs that will result in a complete community, where everyone has the opportunity to thrive.

A summary of the Action Plan, including the key focus areas and goals, is provided on the following pages. The highest priorities in the community are expanding economic development and opportunities, new affordable housing, safeguarding the history and character of the neighborhood, and expanding civic leadership and engagement. Additional focus areas include education, health, parks and community amenities, safety, and mobility and infrastructure.
CIVIC ENGAGEMENT
A complete community is a connected community that is committed to civic engagement, building strong civic organizations, and nurturing new leaders. The goals are:

- **Create a Civic Coalition** to ensure that all organizations are working together to transform the community
- **Strengthen Civic Organizations** through the creation of a Neighborhood Toolbox, and by providing information, education, and outreach
- **Nurture Leaders**, including youth, by providing leadership training

ECONOMY and JOBS
A complete community is a thriving community with local jobs and opportunities, small business resources, retail and amenities, and quality banking services. The goals are:

- **Expand Workforce Training and Resources** through the proposed Texas Workforce Solutions center, by attracting additional job training programs, and by connecting youth to summer jobs and internships
- **Support Small Businesses** by creating an economic development hub, connecting small business owners to loans, grants, skills training, and other resources
- **Create New Jobs** by attracting new industries in growing sectors of the economy and connecting area youth to job opportunities
- **Build a Town Center** to bring needed retail and amenities to the community
- **Grow Family Wealth** through financial literacy programs and by attracting a full-service bank

HEALTH
A complete community is a healthy community with access to healthy food, active living and healthcare. The goals are:

- **Increase Access to Fresh and Healthy Food** by attracting a new grocery store, building community gardens and farms, hosting regular farmers markets, and ensuring that food insecurity is addressed
- **Nurture Healthy and Active Living** by attracting a gym or wellness center and expanding exercise amenities at area parks
- **Improve Well-Being** by expanding healthcare services and programs across the neighborhood

HOUSING
A complete community is an affordable community with high quality housing accessible to people with a diversity of incomes, where existing residents are protected from displacement, historic homes are repaired and preserved, and where community-based organizations are empowered to build. The goals are:

- **Build New Affordable Housing** for people with a diversity of incomes and needs
Executive Summary

Data Sources: ACS 2015 (5-yr); Harris County District Clerk 2016 Data; HPD and UCR 2016 Data, 311 Data 2016, Children at Risk Data 2017, Texas Education Agency 2016

- **Expand Homeownership** by expanding access to homebuyer education and assistance programs
- **Ensure Homes are Safe and Secure** by enrolling seniors and other income-eligible homeowners into home repair programs, expanding access to home improvement loans, and repairing and preserving historic housing
- **Grow Local Community Builders** by providing training, capacity building and workshops for community-based housing and development organizations

**MOBILITY and INFRASTRUCTURE**

A complete community is a resilient community with public transit, walkable streets, and quality infrastructure. The goals are:

- **Create Safe Streets** that improve walkability, pedestrian and bike safety
- **Build Great Streets** by working in partnership with the City to prioritize projects
- **Improve Flood Resiliency** by improving drainage systems, preserving natural areas, and planning for the future
- **Expand Mobility** by improving public transit services and access, including transit amenities
- **Create a Network of Hike, Bike and Bridle Trails** that meet the needs of pedestrians, cyclists, and horse riders
- **Span the Digital Divide** by expanding the number of broadband providers

**NEIGHBORHOOD CHARACTER**

A complete community is a beautiful community with historic neighborhoods and public art that celebrates the identity and culture of the community. The goals are:

- **Work Together to Create a Beautiful Community** by ending illegal dumping, maintaining vacant lots, and organizing clean-ups

**PARKS and COMMUNITY AMENITIES**

A complete community is a green community with beautiful parks, a network of trails, and great community centers. The goals are:

- **String a Necklace of Beautiful Parks** by improving, expanding, and connecting the existing parks and open spaces
- **Build a Network of Trails** by exploring the potential of bayous, easements, and right-of-ways
- **Create Great Community Centers** by improving and expanding existing centers

**SAFETY**

A complete community is a safe community with well-lit streets, healthy pets, and partnerships to reduce crime. The goals are:

- **Create Partnerships to Reduce Crime** by nurturing strong relationships between the community and law enforcement agencies
- **Ensure Healthy Pets and Safe Streets** by addressing stray animals and animal welfare
- **Provide Well-Lit Streets** by creating partnerships to repair broken lights and identify areas in need of additional streetlighting
Key to Abbreviated Organizations
Many City departments and organizations will assist in implementing the projects identified in this Action Plan, while other organizations have been identified as potential partners. Below is a key to the organizations that are abbreviated:

City, School, and Government Departments:
Aldine Independent School District, AISD
Administration and Regulatory Affairs, ARA
Bureau of Animal Control and Regulation, BARC
Department of Neighborhoods, DON
Department of Housing and Urban Development, HUD
Differential Response Team (HPD), DRT
Economic Development Department, EDD
General Services Division, GSD
Harris County Appraisal District, HCAD
Harris County Flood Control District, HCFCD

Young Audiences Houston, YAH
The Acres Home Action Plan has 33 goals and 92 projects, organized into nine focus areas. The highest priority focus areas, as identified by community stakeholders, are economy and jobs, housing, neighborhood character, and infrastructure. Additional focus areas include civic engagement, education, health, parks and community amenities, and safety. The Action Plan that follows was created through five public meetings, including a community design workshop. The Plan includes goals, projects, priorities, timeframes, metrics to measure success over the next five years, and potential partners and programs.

The projects and action steps identified in this plan will be championed by the Acres Home Neighborhood Support Team and the A-Teams (working groups), in partnership with the City and the Planning and Development Department. The A-Teams are working groups established to lead each of the nine focus areas and will report back to the Neighborhood Support Team regarding their progress. The City departments and agencies listed as leads in the plan will provide support and leadership to the A-Teams and the Neighborhood Support Team. Other partners will provide support for the projects.

Greater Ward A.M.E. Church
CIVIC ENGAGEMENT

Introduction
Strong social cohesion and civic engagement is fundamental to creating a complete community. Social cohesion is defined as the willingness of community members to cooperate with each other in order to prosper. Social cohesion has been identified as one of the key indicators of community and personal well-being, and contributes to both health and economic prosperity.

The Acres Home study area is a community of neighborhoods. There are eleven active civic clubs in the area, two active Super Neighborhood Councils, and the Near Northwest Management District. Continuing to expand civic engagement across the neighborhood will work to empower area leaders to be both advocates and agents for change.

Civic Engagement Goals
The three goals to expand civic engagement across the Acres Home Complete Community focus on building a coalition of civic leaders and organizations, increasing the capacity of civic clubs and associations, and nurturing strong leaders. The goals, developed through public meetings, are summarized here and provided in more detail on the following pages. The civic engagement goals are:

Create a Civic Coalition
The Acres Home study area has many active civic organizations, including the Near Northwest Management District and Super Neighborhood Councils in both Greater Inwood and Acres Home. One of the challenges is to improve coordination among these different entities in order for them to work together for positive change. As a means to facilitate working together, a series of projects have been identified to improve communication, participation, collaboration, and action. These include communicating meeting dates, officers, and bylaws for each organization, updating the city website to provide accurate information, and promoting meetings through media outlets.

In addition, a proposed quarterly Complete Communities meeting with all active organizations and the newly developed A-Team will ensure coordination and successful implementation of the projects included in this Action Plan.

Strengthen Civic Organizations
Civic organizations are the heart of a neighborhood. Ensuring that these organizations have the skills and knowledge to advocate for needed improvements and work in partnership with the myriad of City departments and decision-makers will increase the

Data Sources: Harris County District Clerk, 2016; City of Houston Planning and Development Department

54% Of Acres Home registered voters cast a ballot in the 2016 election
61% Of Harris County registered voters cast a ballot in the 2016 election
chances of success. The objective is to develop and provide training on City of Houston services and programs, including 311, neighborhood protection strategies, code enforcement, and other regulatory programs. A Complete Communities Neighborhood Toolbox will also be developed to further support area leaders.

**Nurture Leaders**

A complete community is dependent on area leaders’ capacity to work together for positive change. Providing leadership training to civic club and Super Neighborhood Council officers will ensure that regular meetings of these organizations are well-run and effective. An important part of this goal is to encourage area leaders to enroll in leadership training to further build their capacity to lead and empower others to do the same.

Nurturing young leaders is an important part of this goal. Partnerships will be developed between the Young Adults Building Communities project (Y-ABC project) of the Houston Health Foundation and the Houston Health Department’s My Brothers Keeper program and area civic organizations. The Young Adults Building Communities project provides leadership training for youth, and supports youth initiatives and projects in the community.

ECONOMY and JOBS

Introduction
Generating local opportunities for employment and job training, while also expanding local businesses and resources, will strengthen the local economy to meet the needs of area residents. In 2016, there were 5,167 jobs in Acres Home, a ratio of one local job per four local workers. As a result, many people travel outside of the neighborhood for work.

In addition, the Acres Home study area is poorly served by retail services and other basic amenities, including financial institutions. The Census Zip Code Business Patterns data for 2012, reported that 254 retail stores were located in zip codes 77088 and 77091 combined. Of these, 17% closed within one year. Overall, there was one retail store for every 315 people in these zip codes, which is 25% less than the number of retails stores per person in Houston. Many area residents report that they leave the community to do their shopping.

Economy and Jobs Goals
Five goals were established to build the local economy and job opportunities and include expanding job training resources, local jobs, small business opportunities, and financial literacy and services. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The economy and jobs goals are:

Expand Workforce and Training Resources
Providing improved access to workforce development and job training programs in Acres Home will provide greater opportunities for residents to secure stable and good paying jobs. To this end, the Gulf Coast Workforce Board will be bringing a Texas Workforce Solutions center to Acres Home. Additional partnerships to attract job training programs will also be pursued. Unemployment in the neighborhood will be reduced by expanding access to employment opportunities and training.

Support Small Businesses
Expanding opportunities for small businesses will be achieved by creating an economic development hub (potentially at Bethune Academy), connecting small business owners to loans, grants, and other resources, and certifying local businesses as contractors with the city and as historically under-utilized businesses. In 2015, 443 small business loans were secured for a total of $16 million. In the next five years, the metric to measure success is to increase this investment by 25%, to $20 million.

Create New Jobs
Attracting new industries in growing sectors of the economy, while also building economic opportunities around community assets such as equestrian programs, will create new jobs and expand the local economy. In addition, projects to support area youth by connecting them to job opportunities and apprenticeships will be pursued. Success will be measured by expanding the number of local jobs in Acres Home by 10% in five years, which totals over 500 new jobs.

Data Sources: ACS 2015 (5-yr); Economic Census, Zip Code and Place Business Patterns, 2012; Bureau of Labor Statistics 2018
**Build a Town Center**

Acres Home is without many of the basic shopping amenities that serve other communities. Developing a mixed-use “town center” in the heart of the community, near the intersection of W. Montgomery Road and W. Little York, would attract new retail amenities and residents and expand access to employment.

**Grow Family Wealth**

The Acres Home Complete Community is home to nearly 55,000 people and has a single financial institution, First Convenience Bank branch inside Joe V’s Smart Shop. There are seven nearby check cashing, payday loans, and pawn shops. Civic leaders will work to campaign against payday loan providers and other predatory lending practices, while also working to attract high quality banking services to the community. A Financial Empowerment Center will support this work by providing free professional financial counseling to assist with improving credit, budgeting, and growing savings.

**Early Successes**

The Gulf Coast Workforce Board will bring a Texas Workforce Solutions site to Acres Home.

A Financial Empowerment Center (FEC) is being developed for Acres Home. FEC clients will receive free, one-on-one professional counseling assistance with money management, budgeting, reducing debt, establishing and improving credit, connecting to safe and affordable banking services, and building savings.

The City’s Office of Business Opportunity is providing entrepreneurship, financial education and literacy for the re-entry population in Acres Home through a $10,000 grant.

The National Home Building Institute is offering a 10-week job training program for home building.

Facebook is providing digital skills training for small business owners.

EDUCATION

Introduction
Three school districts serve the Acres Home community—Houston ISD, Aldine ISD and Klein ISD. Aldine ISD serves the majority of the area, with ten schools. Houston ISD has four area schools. Overall, Acres Home is served by fourteen public primary schools, two parochial schools, two early childcare and Pre-K schools and three charter schools. The 2016 Texas Education Agency Academic Performance Report shows that, within Acres Home, Highland Heights Elementary has the lowest reading performance and Wesley Elementary the lowest writing performance. Each of these schools were designated “Improvement Required” in 2016 by the Agency. Obsborne Elementary has performed the best in both reading and math. Overall, 80% of area schools were designated as “Met Standards” by the Texas Education Agency in 2016.

The Acres Home study area is also home to Lone Star College, with HCC Acres Home and HCC Northeast campuses just outside the boundaries. In 2015, 27% of the Acres Home population over the age of 25 did not finish high school, which is higher than the Houston rate of 23%. 14% of Acres Home’s population over the age of 25 had a bachelor’s degree or higher in 2015, compared to 31% in the City overall.

Education Goals
The three education goals work to ensure that quality educational opportunities exist across the community, that strong partnerships are formed between schools, parents, and other partners, and that learning opportunities are available to students of all ages. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The education goals are:

Provide Quality Education for Learners of All Ages
Access to high quality schools and early childhood centers can ensure student success over the long-term, and assist in working towards a complete community. Three of the fourteen public schools in the Acres Home area were designated as “Improvement Required” by the Texas Education

Area School Districts
- Houston ISD
- Aldine ISD
- Klein ISD

73% Of Acres Home residents over the age of 25 had a high school diploma in 2015
77% Of Houston residents over the age of 25 had a high school diploma in 2015

Data Sources: 2015 ACS (5-yr), Texas Education Agency, 2016, Children at Risk, 2017
Agency in 2016. Identifying supportive resources for students, expanding college and career readiness programs, and increasing out-of-school academic and enrichment programs will help to ensure success in school. The goal is for 100% of area public schools to meet the Texas Education Agency’s standards.

According to data provided by Children at Risk, 19% of the 3,136 early childcare seats in Acres Home can be defined as “quality,” while only 2% are Texas Rising Star certified. In addition, 11% (or 340) of early childcare seats are subsidized. The subsidized seats meet the needs of only 18% of low-income working parents with children. The goal is to increase the number of both high quality and subsidized early childcare seats to better meet the needs of working parents in the community.

Develop Strong School-Community Partnerships
The National Education Association reports that “family engagement in schools improves student achievement, reduces absenteeism, and restores parents’ confidence in their children’s education.” Parents who are engaged in their children’s schools increase the likelihood that their child will succeed. Creating strong school and community partnerships will increase parent engagement in schools, while also inviting partners and leaders to provide needed support and resources. Specific projects include identifying best practices in communication strategies and methods to build strong partnerships.

Create a Knowledge Community
Opportunities for lifelong learning create complete communities. Expanding awareness of career training and education programs at area community colleges and improving access to adult education programs and resources, including those at the neighborhood library, will provide opportunities for adults to build their skills and careers. In addition, developing shared lending agreements, for books and other resources, between the neighborhood library and area community colleges will enhance access to learning tools.

Early Successes
The United Way, in partnership with the Mayor’s Office of Education, the Houston Endowment, and Harris County Department of Education launched the Out 2 Learn website, a directory of out of school programs for youth. Visit http://out2learnhou.org/.

The Houston Public Library has expanded youth programs at many Complete Communities libraries. Visit the Shepard-Acres Home Neighborhood Library to learn more, http://houstonlibrary.org/location/shepard-acres-homes-neighborhood-library.

The Mayor’s Office of Education hosted a public meeting focused on education in each of the five Complete Communities. The Acres Home meeting was held at HCC Acres Homes Campus in January of 2018.

HEALTH

Introduction
A complete community is a healthy community. According to the USDA’s Food Desert Atlas, seven of the eleven census tracts that comprise the Acres Home study area are in a food desert (located more than a mile from a grocery store). The seven tracts are home to nearly 38,000 people. In addition, over 3,000 low-income families without a vehicle live more than 1/2-mile from a grocery store. There are only two grocery stores in the neighborhood, Joe V’s on N. Shepherd and Foodarama on Antoine Drive, located on the far eastern and western edges of the community respectively. There are numerous small grocers and convenience stores across the neighborhood.

In 2015, 72% of Acres Home residents had health insurance, similar to the City of Houston overall where 73% of residents had health insurance. The United Memorial Medical Center, UT Physicians Victory location, and a number of health clinics and doctor’s offices serve the community.

Healthy and active living requires quality parks, sidewalks and trails, and freedom from safety concerns such as stray animals. The Houston Health Department’s Health Profile found that 65% of adults in Acres Home engaged in regular physical activities, lower than 71% in Houston overall.

Health Goals
The three goals to improve health across the Acres Home Complete Community include expanding access to fresh and nutritious food, increasing opportunities for active living, and ensuring people have access to healthcare and health resources. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The health goals are:

Increase Access to Fresh and Healthy Food
“Making the healthy choice the easy choice” is at the foundation of the projects to expand options for healthy food in the neighborhood. This includes community-based projects such as establishing a weekly farmers market, expanding community gardens and farms, food pantry programs (such as Brighter Bites and the Houston Food Bank’s Food Scholarship program), and providing cooking and nutrition classes. Additional projects include developing partnerships to attract healthier restaurants and a major grocery store, particularly in the central section of the community.

72% Of Acres Home residents had health insurance in 2015
73% Of Houston residents had health insurance in 2015

Data Source: 2015 ACS (5-yr); Complete Community Health Profile, Acres Home 2017, Houston Health Department
A complete community is a healthy community with access to fresh and nutritious food, active living and high quality healthcare.

Nurture Healthy and Active Living
Active living helps to fight obesity and chronic diseases. According to the Houston Health Department’s Health Profile for Acres Home, the percentage of adults (18+) in Acres Home who were obese ranged from 40% to 47%, much higher than the Houston rate of 34%. The Healthy People 2020 target is to reduce the proportion of adults aged 20 and older who are obese to 30.5%. To achieve this goal, community leaders will pursue projects to expand area trails and install exercise stations at local parks and the Acres Home Multi-Service Center. In addition, attracting a wellness center or gym to the neighborhood will encourage more people to adopt healthy and active lifestyles.

Improve Well-Being
According to the Health Profile completed by the Houston Health Department, adults in the Acres Home study area are more likely to have received an annual routine check-up than in Houston overall, 74% compared to 67%. Still, access to health information and education was identified as a key priority. In addition, access to comprehensive healthcare, including mental healthcare, dental care, substance abuse prevention and recovery programs, and home services for seniors are important priorities.

74% Of Acres Home adults (18+) received a routine check-up in 2013-2014
67% Of Houston adults (18+) received a routine check-up in 2013-2014

HOUSING

Introduction
The Acres Home Complete Community study area is characterized by housing developments that vary greatly in age, style, and lot size. Each distinct area, from the original acre lots on the southern edge of the community to the 1970s housing in the far western section, has a unique character. The housing goals are as diverse as this landscape. In some areas, preserving the historic housing and development patterns is essential to preventing the displacement of residents and the loss of history. In other areas, such as W. Montgomery, there are substantial vacant lots where new single-family infill housing and higher-density mixed-income housing could help to establish a “town center” and grow the community around a core.

Housing Goals
The four Acres Home Complete Community housing goals focus on building new affordable housing, increasing the number of homeowners, repairing existing housing, and nurturing and growing an Acres Home community development corporation or community housing development organization. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The housing goals are:

Build New Affordable Housing
The Acres Home community is growing, new residents are moving to the area and new housing is being built to fit their needs. As the community grows, home values have been rapidly rising, as is the case in Houston overall. For example, the median listing price for homes in zip code 77091 (south of Little York Rd) rose from $98,900 in June of 2015 to $145,000 in June of 2017, a 47% increase over two years. Median home listing prices in zip code 77088 (north of Little York Rd) rose from $115,000 to $139,900 in the same time period, a 22% increase.

Rising housing costs point to the need for new affordable housing. Nearly 8,000 households in Acres Home were burdened with high housing costs in 2015, spending more than 30% of their income towards this expense. Building new affordable single-family housing and higher density mixed-income rental housing will ensure that the area’s housing meets everyone’s needs. New housing will be focused on the 135 LARA lots that are currently owned by the City. Over time, success will be measured by the number of new affordable housing units available in the community.

Expand Homeownership
Acres Home has historically been a community of homeowners. In 2015, 53% of households owned their own homes, a much higher percentage than Houston overall where 44% of households owned their home. Yet, similar to communities across Houston and the United States, homeownership is declining. Between 2000 and 2015, the number of homeowners declined by 445 in Acres Home. Connecting potential buyers to homeowner education workshops and financial

61% Of renters paid more than 30% of their income on housing in 2015
30% Of owners paid more than 30% of their income on housing in 2015

assistance programs will help to increase the number of homeowners in the community.

**Ensure Homes are Safe and Secure**
Ensuring that existing residents are secure in their current homes is an important goal. In 2015, over 3,500 seniors headed households in Acres Home, and 2,885 were homeowners. Maintenance and repairs can become a burden for seniors, who are often constrained by fixed incomes. In 2015, 13% of all seniors in the area had incomes below the poverty line. Enrollment in home repair programs, providing information on tax exemptions, and offering other assistance programs would ensure that seniors and other eligible homeowners remain safe and secure in their homes into the future. It is also important to assist interested homeowners in securing affordable home improvement loans.

**Grow Local Community Builders**
The Acres Home community is served by two community development corporations, Common Unity CDC and Nation Sync CDC. Building these organization’s capacity to serve the community, including the ability to build affordable housing and attract outside investment, is critical to ensuring that the goals for new housing outlined in this Action Plan are achieved. Success will be measured by securing city certification of one existing or a newly developed CDC, as a community housing development organization.

---

**Home improvement loans were approved in Acres Home in 2016, 28% of all applications**

**Home improvement loans were denied in 2016, 72% of all applications**

MOBILITY and INFRASTRUCTURE

Introduction
A complete community is a connected and resilient community, connected to opportunity through public transit, walkable streets, and quality infrastructure. High quality streets and sidewalks increase walkability, connectivity, and spark new development.

Acres Home is adequately served by public transit with seven local METRO bus routes, two of which are high frequency routes, running every fifteen minutes. However, while 11% of households are without a car, only 4% of workers use public transit to get to work, which is equal to Houston overall. Fewer than 1% of area workers walk or bike to their jobs.

Mobility and Infrastructure Goals
The six goals to improve mobility and infrastructure include building safe and complete streets, improving area streets, ensuring the community is flood resilient, expanding mobility and transit, linking the community through trails, and spanning the digital divide. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The mobility and infrastructure goals are:

Create Safe Streets
A survey of sidewalk conditions adjacent to area schools was completed. The analysis indicates that nearly all area schools need connecting sidewalks. Encouraging students and parents to walk to school can improve health through physical activity. Planned priority sidewalk projects focus in areas adjacent to schools (see map, below left), but additional sidewalk investment is critical. In addition to creating a complete network of sidewalks, area crosswalks and school zones need to be evaluated for safety. This includes exploring strategies to calm traffic, protect

Priority Sidewalk Projects
- New Sidewalk
- New School Safety Zone
- Schools
- Parks

School Sidewalk Survey
- No Sidewalk
- 1/4-mile radius
- Schools
- Parks
school children from hazards, and advocate for high visibility crosswalks. Overall, increasing walkability and safety in the neighborhood is an important goal.

**Build Great Streets**
Improving community streets can encourage economic development, increase property values, and provide for greater mobility. Ensuring that streets accommodate all residents’ needs is an important goal. Civic leaders will be working in partnership with Houston Public Works to evaluate and prioritize street improvement projects. Current priorities include De Soto Street, Antoine Drive and the extension of TC Jester north, from Victory Drive to SH 249.
Improve Flood Resiliency
The Acres Home Complete Community has substantial land and buildings inside the 100- and 500-year flood plains. These areas are concentrated along White Oak Bayou and Vogel Creek in the Inwood area, and adjacent to N. Shepherd Drive on the eastern edge of the Acres Home community. During Hurricane Harvey both of these areas had a high number of calls to 311 for flooding, as indicated on the heat map below. Other areas outside of the flood plain also experienced flooding, suggesting that local drainage systems also require improvement.

Protecting the area from flooding is a long-term goal. To this end, leaders will work in partnership with the Harris County Flood Control District and Houston Public Works to move forward the proposed re-purposing of the former Inwood Golf Course for flood detention and green space. Furthermore, studies are needed to identify additional strategies to reduce the risk of flooding in the eastern portion of the neighborhood and other areas outside of the flood plain.

Properly maintaining area ditches and right-of-ways will also ensure that the flood risks in the community are minimized where possible. This includes preventing dumping in White Oak Bayou.

Expand Mobility
Acres Home is served by seven METRO bus routes, yet a number of transit improvement projects were identified to greatly enhance connectivity in the neighborhood. The projects include extending METRO’s Little York (79) bus route to the West Little York Transit Center, exploring the potential for additional high frequency routes, creating a new METRO Community Connector route to link to Lone Star College, and providing basic amenities, such as benches and shelters, at area bus stops. In five years, the objective is to have at least four transit improvement projects completed.
Create a Network of Hike, Bike, and Bridle Trails
Acres Home is under-served in terms of bicycle amenities. Today, there are no on-street bike routes or B-Cycle Stations in the entire neighborhood. Expanding on-street bike lanes and other cycling amenities will encourage more people to engage in active living. Bayou Greenway trails line 2.5 miles of White Oak Bayou on the western edge of the study area, but expanded trail access is desired. Leaders will work in partnership with the Houston Parks Board’s Beyond the Bayous program and other partners to identify easements and other potential trail network locations for new hike, bike, and bridle trails. Bridle trails, an idea that is founded in Acres Home’s history and culture, should be planned to work in conjunction with new hike and bike trails. The objective is to have an additional five miles of trails by 2023.

Span the Digital Divide
A recent survey of broadband connectivity across Houston was conducted by January Advisors. The survey found substantial disparity in the services available in the city. Acres Home is served by two broadband providers, while most areas of the City can choose from three or more. Eliminating the disparity in access to affordable broadband services is an important goal. As a result, leaders will work with the City, HISD, AISD, and KISD to explore the potential for public Wi-Fi locations, including enhanced access at area schools, and additional towers and high-speed fiber services. The objective is to have one additional broadband provider serving the neighborhood by 2023.

NEIGHBORHOOD CHARACTER

Introduction
A complete community is clean and beautiful and has a strong sense of identity, culture, and community. It is a place that celebrates its history, while looking forward to the future.

Since its founding, the Acres Home neighborhood has grown and changed, yet many lots remain vacant and undeveloped. In total, 21% of land area in the neighborhood is currently vacant. As a result, illegal dumping has become one of the neighborhood’s largest challenges.

Neighborhood Character Goals
The three goals established to strengthen the character of the neighborhood focus on beautification, preserving and celebrating history, and expanding arts and culture across the community. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The neighborhood character goals are:

Work Together to Create a Beautiful Community
Acres Home leaders are prepared to work together to ensure the neighborhood is clean and beautiful. In 2016, there were 382 calls to 311 to report illegal dumping in Acres Home, a number nearly twice the city average per capita. Illegal dumping is concentrated on the eastern edge of the neighborhood (see the map to the right), where vacant land is also concentrated. Vacant lots can also create nuisances if not properly maintained and mowed. Over the coming years, the goal is to bring area civic clubs and leaders together to address illegal dumping and overgrown lots, to organize neighborhood clean-ups, and work with the Houston Police Department to address nuisances. The objective is to reduce illegal dumping by at least 25% over the next five years.

Preserve History and Plan for the Future
Acres Home has developed as a series of small subdivisions, each with its own character. Today, the neighborhood is still growing and changing. Leaders will work to protect the historic character of the neighborhood while planning for future development through the creation of a master plan. The plan will include identifying neighborhood protection strategies such as minimum lot sizes, deed restrictions, and other development controls. Leaders will also advocate for additional oversight by permitting and code enforcement to prevent future nuisances. The goal is to ensure the character of the neighborhood is honored and maintained.

7 311 calls to report illegal dumping per 1,000 Acres Home residents in 2016

4 311 calls to report illegal dumping per 1,000 Houston residents in 2016

Data Source: City of Houston 311 Data, 2016

Illegal Dumping and Closed Landfills
- 311 Calls for Illegal Dumping (2016)
- Closed Landfills
Spread Arts and Culture Across the Community
The arts are an integral part of enhancing a neighborhood’s character and identity. A key priority of Houston’s recent Arts and Cultural Plan is to “develop strategies to deliver arts and culture programs, arts education and public art into neighborhoods.” By expanding on existing civic art, including the mural project at White Oak Bayou Village, the identity and culture of the community will be enhanced.

Acres Home leaders and stakeholders have identified five key projects to expand the arts across the community. The projects include attracting an arts and performance center, implementing public art projects across the neighborhood (including four mini-murals), organizing and growing events and festivals, and celebrating the area’s rich history by applying for designations for area landmarks. The objective is to bring at least six new public art projects or installations to the neighborhood in the next five years.

Early Successes
The Mayor’s Office of Cultural Affairs is leading an inclusive cultural strategy to bring new programs and expand existing ones in each Complete Community. This includes four new Mini Murals, a Civic Art project, the Visit My Neighborhood grants, creative writing workshops, and a Neighborhood Poetry Project by Houston Poet Laureate, Deborah ‘DEEP’ Mouton.

PARKS and COMMUNITY AMENITIES

Introduction
Four parks are located in the Acres Home study area, with a cumulative area of 59 acres. The recommended area of parks for the neighborhood, based on the Houston Parks and Recreation Department’s 2015 Master Plan, is 137 acres. By this standard, Acres Home, and neighboring Inwood, are underserved by public parks. However, in Acres Home the large, almost rural, lots extend access to open spaces for residents.

Overall, only 37% of area residents live within a 10-minute walk of a park. The highest park needs are in the northwest portion of the neighborhood in the Inwood area. Parks provide environmental, health, aesthetic, and recreational benefits, and enhance property values and increase municipal revenue.

Parks and Community Amenities Goals
The three goals to enhance parks and community amenities focus on improving and expanding existing parks, creating a community trail network, and improving existing or building new community centers. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The parks and community amenities goals are:

Necklace of Beautiful Parks
Each of the four neighborhood parks in the Acres Home study area has different amenities and assets. Highland Park is the gateway to the community and to White Oak Bayou to the west. The park is family-oriented and serves as a strong civic gathering place. Sylvester Turner and Carver Parks represent the “green heart” of the neighborhood, with programs for active seniors, sports fields, and trails. Sylvester Turner Park also hosts the Houston Astros MLB Urban Youth Academy which features a show field, auxiliary field, permanent seating for 500 fans, dugouts, and lights. Finally, Lincoln Park is one of the most active parks, with a covered basketball court, community center that hosts exercise classes, a pool, and tennis courts.

Each park is also in need of improvements. The aim is to identify community priorities for upgrading facilities and providing new amenities, such as exercise stations, event space, and community gardens, while also maximizing the potential of recently acquired parcels to expand both Highland Park and Sylvester Turner Park.

Finally, the former Inwood Golf Course, near Vogel Creek and White Oak Bayou, represents a great opportunity to expand park space, create detention, and reduce flooding in the western portion of the study area with the highest park needs. Design strategies proposed for the golf course and surrounding area include a lake with boats and a boardwalk, playground, splash pad, concert pavilion, dog park, and outdoor exercise stations.

Community Trail Network
The Houston Parks Board, in cooperation with the Houston Parks and Recreation Department, has completed trails along White Oak Bayou in the western portion of the Acres Home study area. Expanding on this system to create a network of hike and bike trails across the community will create greater connectivity. This project is supported by the Houston Park Board’s Beyond the Bayous initiative that identifies strategies to connect neighborhoods to the Bayou Greenways. In the coming years, civic leaders will work in partnership with the Houston Parks Board and
others to explore a series of trail projects, including developing an on-street connection at De Soto across White Oak Bayou and a connector trail along Vogel Creek. In addition, exploring a “bridle trail” for horse riding will support Acres Home’s rural heritage and enhance neighborhood connectivity. Opportunities for a bridle trail include an existing east-west easement near W. Gulf Bank Road, and north-south connections on smaller right-of-ways. New amenities along the trails, such as lighting, benches, shade, pocket parks and water fountains, are also being pursued. The objective is to have a total of five miles of trails weaving throughout the community in five years.

**Great Community Centers**
The Acres Home community is served by three community centers. Lincoln Park and Highland Park both have community centers that provide programs for children, youth, and seniors. In addition, the Acres Home Multi-Service Center provides many programs and services to area residents. Evaluating the existing community centers and working with leaders to determine future needs and programs, such as a computer lab, community meeting space, exercise space, and senior and youth resources, is an important goal.

SAFETY

Introduction
A complete community has well lit and safe streets, and is a place where the community and law enforcement agencies work in partnership to reduce crime. The Acres Home study area, which includes all of the Acres Home Super Neighborhood and the eastern portion of Greater Inwood, is served by HPD’s North Division and is comprised of police beats 6B20, 6B30, and 6B40. The overall area’s property crime rate was 4% above the Houston average in 2016, and the violent crime rate was 53% higher. The overall crime rate in the Acres Home Complete Community was 13% above the Houston average in 2016. The area with the highest concentration of crime is near the intersection of De Soto Street and Bolivia Boulevard.

Safety Goals
The three goals to enhance safety in the Acres Home Complete Community focus on nurturing partnerships between the community and law enforcement agencies to reduce crime, ensuring pets are safe and healthy, and improving street lighting. The goals, developed through a series of public meetings, are summarized here and provided in more detail on the following pages. The safety goals are:

Create Partnerships to Reduce Crime
The property crime and violent crime rates in the Acres Home study area are higher than in the City overall. To improve safety in the community, stronger partnerships will be developed between law enforcement agencies and community leaders and stakeholders, including property owners. This will be achieved by encouraging stakeholders, civic club, and Super Neighborhood leaders to attend regular meetings of HPD’s Positive Interaction Program. These meetings provide an opportunity for community leaders to share their top safety concerns with police and to work in partnership to solve these issues.

In addition, communication tools will be created to promote the many ways local residents, business owners, and others can contact the police to report concerns. Finally, encouraging participation in HPD programs, such as the Citizen’s Police Academy and Police Athletic League, will help to build bridges between the community and law enforcement.

Ensure Healthy Pets and Safe Streets
Stray animals are a problem across the City of Houston. In 2016, Houston’s Bureau of Animal Control and Regulation (BARC) received 47,917 calls for service.

Data Sources: Beat 6B20, 6B30 and 6B40 Crime Statistics 2016, HPD; UCR Crime Statistics for Houston, 2016; City of Houston 311 Data, 2016
The agency took in 27,638 animals, of which 52% were strays. In the same year, 639 calls were made to 311 to report stray animals in Acres Home, approximately half the rate per capita of the City overall. Yet, stray animals, particularly dogs, impact safety in a neighborhood and discourage walking or other active recreation.

To address stray animals in Acres Home, partnerships will be developed with BARC and other animal welfare organizations to provide education and services to encourage responsible pet ownership, including spay and neuter programs. The goal is to reduce the number of calls to 311 for stray animals by 25% over the next five years.

**Well-Lit Streets**
Street lights enhance safety in a community. Over the coming years, the Safety A-Team will work in partnership with the Code Enforcement Division of Houston Public Works and CenterPoint Energy to ensure all existing lights are working properly. In addition, community leaders will identify areas where additional lights are needed and work with Houston Public Works and CenterPoint Energy to advocate for new streetlights. The objective is to repair at minimum 10 lights each year.

**Early Successes**
The Code Enforcement Division has surveyed streetlights in each Complete Community every four months to identify broken lights and report to CenterPoint Energy for repair. Since August of 2017, 157 streetlights have been reported.

OUR THANKS

Complete Communities

The Complete Communities initiative would not have been possible without the commitment and dedication of the Complete Communities Advisory Committee and the Acres Home Neighborhood Support Team (NST). The Advisory Committee, comprised of community leaders and advocates, ensured that the program structure was inclusive, promoted public-private partnerships, and worked effectively and efficiently. The Acres Home NST guided the planning process and shaped the initiative at the local level. Finally, the newly formed Acres Home A-Teams will oversee implementation for each of the nine focus areas. We thank everyone for their time and commitment to the Complete Communities initiative.

ACRES HOMES COMMUNITY

In 1910, land developer Alfred A. Wright platted the first of several subdivisions that eventually became the African American community of Acres Homes. Wright sold parcels of varying sizes to residents who were attracted to the rural area by the inexpensive land, low taxes, and the absence of building restrictions, as well as the slow-paced life and wide-open spaces of rural living. Despite the lack of common municipal services such as electricity, street lights, garbage disposal, sewer and water, Acres Homes flourished as a self-contained community. In 1957, Negro Life Magazine described Acres Homes as the “largest all Negro community in the United States.” By 1974, the community extended roughly from West Tidwell to Gulf Bank and from North Shepherd to White Oak Bayou and Duboise. The residents included farmers, laborers, factory workers, “waterfront” workers and domestics who commuted to work in other parts of town.

The first church, Galilee Missionary Baptist, was organized in 1915, and the first school, White Oak Colored, opened in 1915. From the 1930s through the 1950s, a large migration of settlers moved into the area, organizing civic clubs and building homes, churches, Masonic halls and businesses. The first dry goods store, drug store and post office opened in 1945. The first black-owned bus company in the South, the Acres Homes Transit Company, operated from 1959 until 1968.

Integration and the gradual annexation of Acres Homes by the City of Houston from 1967 to 1974 brought population diversity and transformation to Acres Homes. However, Acres Homes continues to retain its strong community identity and civic pride.

Marker is property of the State of Texas (2008)
