

# HPD - VIGILANT SOLUTIONS, LLC LEARN SUBSCRIPTION RENEWAL TTI PRESENTATION

Dana Hitzman, Commander  
Houston Police Department  
Auto Theft Division

September 3, 2020

# VIGILANT SOLUTIONS SUBSCRIPTION INFO

- Vigilant Solutions, LLC selected as vendor for sole source purchase of Law Enforcement Archival & Reporting Network (LEARN)
- Subscription for 5 years
- Enterprise license for unlimited access to the nation's largest repository of commercial License Plate Reader (LPR) data, analytical tools via National Vehicle Location Service (NVLS) and LEARN tools
- System presents officers with intelligence and analytical tools for investigations involving vehicles linked to suspects and crimes across a broad range of investigations

# VIGILANT SOLUTIONS COMMERCIAL LPR DATA

- Generated primarily from Vigilant's agreements with asset recovery (repossession) companies
- Each data point is a picture of a license plate combined with Optical Character Recognition (OCR), GPS Location, Time, Date and Source Signature
- Vigilant Solutions offers largest repository of commercial License Plate Reader data. Approximately 6.5 Billion Records\*

\*<https://drndata.com/> and <https://www.vigilantsolutions.com/faqs/>

# DATA ANALYTICS CAPABILITIES

- **PlateSearch** – users can search data for records of specific or partially specific license plates within parameters of date, time, and location defined by the user
- **LocateAnalysis** – system generates report to give users location, date, and times of highest read frequency for a specific license plate within the data set
- **StakeOut** – users can search data for records within a radius of a specific location for parameters of date and time. No license plate information is needed for this report.

# DATA ANALYTICS CAPABILITIES (CONT.)

- **Common Plate Report** – system generates a report to identify license plates that have been recorded at multiple locations defined by user.
  - Useful for serial crime instances
  - Useful to find vehicle tied to suspects with multiple known address associations
- **Associate Analysis Report** – system generates a report to identify license plates that have been recorded multiple times across multiple locations within defined radius of known target license plate
- **HotPlate** – users flag specific license plate for specific reason and receives notice via email, text or mobile application of vehicle occurrence in LPR data

# CONTRACT RENEWAL

- Enterprise license for unlimited access to the nation's largest repository of commercial License Plate Reader (LPR) data, analytical tools via National Vehicle Location Service (NVLS) and LEARN tools
