SECTION I OVERVIEW

SECTION II FY 2019 FULL COST ALLOCATION PLAN BASED ON ACTUAL

**EXPENDITURES FOR THE FISCAL YEAR ENDED JUNE 30, 2016** 

City of Houston, Texas
Houston Police Department
FY2019 Full Cost Allocation Plan
Based on Actual Expenditures For
the Fiscal Year Ended
June 30, 2017

### **OVERVIEW**

A cost allocation plan is an accounting report that documents the value of indirect costs provided by central service agencies to other government agencies. Indirect costs are costs:

- (a) "incurred for a common or joint purpose benefiting more than one cost objective, and
- (b) "not readily assignable to the cost objectives specifically benefited, without effort disproportionate to the results achieved." 1

A central service agency is a unit of government that provides centralized services to other government agencies. For example, generally it would not be cost effective for each government agency to have its own payroll and accounting services. Usually, there are centralized payroll and accounting offices that assist agencies within the government.

<sup>1</sup>2 CFR Part 200.56

#### **USING A COST ALLOCATION PLAN**

A cost allocation plan is primarily used for the recovery of indirect costs expended on behalf of programs of the U.S. Government. Additionally, a cost allocation plan is an important management information tool because it goes beyond budget and year-end accounting documents to describe the actual cost of providing services to the public. When the value of all central services are accumulated and added to the departmental expenditures as per the financial reports, the actual cost of providing the service is the result.<sup>2</sup>

A cost allocation plan is composed of five primary components:

- Central service agencies,
- Benefiting agencies,
- Expenditures of central service agencies,
- Functions or activities carried out by central service agencies, and
- Means of allocating the functions or activities of central service agencies.

For purposes of cost allocation, agencies (departments, divisions, sections, bureaus, etc.) of a governmental entity are separated into two groups, central service agencies and benefiting agencies. As previously stated, a central service agency is a unit of government that provides centralized services to other government agencies. These agencies carry out services that benefit other government agencies. They may also perform services for the general public but it is the functions they perform that help other agencies provide their services that are to be allocated in the cost allocation plan. Benefiting agencies are those units of government that do not provide central services but rather deliver services to the public.

<sup>&</sup>lt;sup>2</sup> There could be additional costs of providing the service that are not allocated in the cost allocation plan because the costs do not meet federal standards. These additional costs can only be identified if a cost allocation plan is prepared according to Generally Accepted Accounting Principles (GAAP), not principles identified in the 2 CFR Part 200.

The costs of providing central services are identified from the government's financial records. Expenditures of the central service agencies are analyzed to ensure the expenditures are allowable according to federal standards and to identify expenditures that may benefit another agency or agencies disproportionately to others. After analyzing, the expenditures are distributed into cost pools called functions or activities.

One or more function or activity is identified for each central service agency. Examples of functions are payroll services, administrative coordination, building operations, and legal services. The purpose of identifying the various activities within a unit of government is to allow for different allocation bases to be used to distribute the costs of providing the function.

An allocation basis is a reasonable and measurable means of distributing costs to those units of government that benefit from the service. Different allocation bases are required to recognize the value of providing a service proportionate to the service received. It is reasonable to allocate payroll services based upon the number of payroll checks issued. It is most likely not reasonable to allocate payroll based upon square footage of occupied space. The chosen allocation basis reflects the service being provided and reflects those who benefit from the service.

After this is accomplished, the information is entered into the City's financial system. This system performs the mathematical operations of allocating costs from central service providers to benefiting agencies. The system performs two allocations. The first allocation distributes the central service agency's <u>direct</u> expenses to all agencies within the government that benefit from the services provided by that central service agency. Those benefiting agencies may include other central service agencies. The second allocation takes the result of the first allocation to central services agencies, the incoming <u>indirect</u> costs, and reallocates those indirect costs. Using a multiple allocation methodology more equitably distributes central service costs to all agencies, including the indirect costs that come from other central service agencies.

Result of the mathematical operations through the cost allocation plan documents indirect costs. Some of the benefiting agencies may participate in programs that are eligible for recovery from the federal or state government. The sum calculated by benefiting agency is the maximum amount the government should have recovered during the fiscal year in question. In addition, the cost allocation plan provides management information by helping to more closely identify the total costs of providing services to the public.

# READING THE COST ALLOCATION PLAN

The cost allocation plan is produced in schedules. Except for the summary schedule, each schedule represents one central service agency. The summary is at the front of the document after the Table of Contents and it accumulates data from each of the subsequent schedules.

The Table of Contents serves to assist the reader in navigating the document but also describes the allocation basis for each function that is allocated.

Each schedule is composed of the following sections:

- Department Costs
- Incoming Costs
- Total Allocated
- Allocations
- Allocation Summary

Department Costs identifies the amount of costs incurred by the agency as reported in the financial records. Costs are categorized as salaries, benefits, and various operating costs, as appropriate. This section also documents the distribution of expenditures between the identified functions. Between the costs categories and the functions, the reader will find the letters "S," S1", "P," or "D." These are codes that instruct the cost allocation system how to distribute expenditures between functions. "S" stands for salaries as documented in the Personnel Service Analysis, "S1" means based on reported salaries and wages by function, "P" indicates that a percentage has been used, and "D" means that the expenditure has been disallowed from allocation.

Incoming Costs details the indirect costs that are allocated to the agency by other central service agencies. As noted on the previous page, the system uses a multiple allocation approach. This section documents the amount of the first and second allocation and its origin. If the reader is interested in knowing where a cost is derived, the reader can go to the referenced schedule and verify the amount of the allocation and the basis for the allocation.

Total Allocated is the sum of Department Costs plus Incoming Costs. This is the total amount by function that is allocated to benefiting agencies of the services rendered by this central service agency. The Allocation section, documents the distribution of the Total Allocated by each separate function. Benefiting departments are identified as the allocation basis and units. First and second allocations are calculated and any billings made by the central service agency to those agencies that benefit from the services are identified to provide a credit to the allocated amounts. There will be as many allocations as there are different functions that are allocated.

The last page of each schedule will be the Allocation Summary; this section shows the total amount allocated by function to each benefiting agency.

Each schedule of the cost allocation plan is described in the narrative section called Function and Allocation Basis. The purpose of the narrative is to explain what costs are being allocated in the cost allocation plan. The narrative describes any unusual circumstances that may have occurred during the fiscal year, describes the functions or activities that have been identified, and discusses the allocation basis and source for each function. If agencies are billed for the service, that will also be noted.

Note: FY2017 data has been used as the allocation basis in most functions, unless otherwise not available, in which case most recent available data was used.

# INDIRECT COST RATE PROPOSAL

An indirect cost rate proposal is required to substantiate the establishment of an indirect cost rate. A cost allocation plan may be used to determine a specific dollar amount that can be recovered from a particular program or grant. An indirect cost rate proposal is used to calculate a specific percentage rate that can be applied against a particular rate base to determine how many dollars can be recovered from the particular program or grant. The City of Houston's indirect cost rate is calculated as the total indirect cost pool divided by the total personnel costs. The resulting equation is the indirect cost rate for that particular program or grant.

### **ABBREVIATIONS**

In the accounting documents in Section III the reader will find abbreviations, such as "svcs" for "services" and "blds" for "buildings" The reader may also find some words that appear to be misspellings, such as "adventre" instead of "adventure" or "assessrs" for "assessors." These abbreviations are necessitated by the formatting limitations that are required to present a complicated accounting document in a consistent manner. Where possible, we have spelled the name of an agency as completely as possible. Where necessary, we have taken liberties to abbreviate words to fit most recognizably into the available space.

## **ROUNDING METHODOLOGY**

The reader may discover that in some of the cost plan schedules the software rounds decimal numbers. However, the software actually calculates using many more decimal places than shown on the printed page. These rounding conventions allow complex, multiple calculations and iterations to be presented in a consistent, simplified manner.

For example, when the software processes allocation calculations for each allocated function, the allocation basis for each individual department is divided by the total number of allocation units for that function. The resulting percentage is displayed with only 4 decimals (e.g. 10.2311%); however, the program uses the entire quotient to multiply against the entire functional cost and fully allocates the cost of the function. This means that the truncated percentages, when added on a calculator, may not always add exactly to 100%. This occurs because the percentages have been rounded to the nearest 10,000th of a percent.

It also means that when the truncated allocation percentage is multiplied by the total function cost, the dollar allocation may be slightly different. The allocation may be slightly different because the program uses a percentage with an extended number of decimal places to make the calculation, instead of the truncated number on the printed page. Hence, the allocations are made with increased accuracy, even though the printed page only shows the truncated amounts. Likewise, the allocations resulting from this calculation are rounded to the nearest dollar for presentation purposes and, when added with a calculator, may or may not add exactly to the allocated amount.

## CITYWIDE INDIRECT COSTS FUNCTION AND ALLOCATION BASIS

Citywide indirect costs are allocated in the Police Department Cost Allocation Plan. These costs represent the Police Department's share of the central service costs allocated through the city's Full Cost Allocation Plan. Indirect costs are allocated 50% based on FTEs and 50% based on expenditures. Claims & Judgements indirect costs are allocated directly to Law Enforcement. General Services indirect costs are allocated based on FTEs, excluding Aviation.

## CHIEF'S COMMAND FUNCTION AND ALLOCATION BASIS

The Houston Police Department is responsible for the preservation of law and order within the corporate limits of the city. The Chief's Command is responsible for the general administration and support of the department.

The activities of the Chief's Command are identified and allocated as follows:

- Administration Cost of the Chief's Command administrative section has been allocated based on the number of FTEs staffed within the administered divisions.
- **Budget & Finance** Costs of the financial and budgetary services provided to all divisions in the Houston Police Department have been allocated based on operating expenditures.
- Legal Services Costs of departmental legal services have been allocated based upon the number of billable hours.
- Public Affairs Costs associated with Public Affairs have not been allocated in this plan.
- **Inspections** Costs of audits performed by the Inspections Division have been allocated based on the number of audits performed.
- Internal Affairs Central Intake Office Costs of the Internal Affairs Division have been allocated based on the number of investigations.
- Crime Analysis Costs associated with crime analysis are allocated directly to Law Enforcement.
- **Planning –** Costs associated with planning are allocated directly to Law Enforcement.

## PROFESSIONAL DEVELOPMENT COMMAND FUNCTION AND ALLOCATION BASIS

The Professional Development Command in the Strategic Operations division is responsible for the hiring and training of classified and civilian personnel. It is also responsible for the training activities, disciplinary actions, drug testing, employee services and retiree insurance. The Command's allocable functions are allocated as follows:

- **General Administration** Cost for general administrative and clerical work are evenly spread across the department's activities.
- Psychological Services Costs are allocated based on the number of FTE's per division.
- **Training** Costs are allocated based on the number of classified FTE's per division.
- Cadet Training Costs are allocated directly to Law enforcement.
- **Employee Services** Costs associated with employee services are allocated based on the number of FTEs per division.
- **Retiree Insurance** Costs associated with retiree insurance are allocated based on the number of classified FTEs per division.

## STAFF SERVICES COMMAND FUNCTION AND ALLOCATION BASIS

The Staff Services Command in the Strategic Operations division is responsible for developing long-range strategies, communications, the jail functions, property and preserving records. The Command's allocable functions are:

- General Administration Costs for general administrative and clerical work are evenly spread across the department's activities.
- **Emergency Communications** Costs associated with emergency communications are allocated directly to Law Enforcement.
- **Records** Costs associated with the maintenance of police records are included in the citywide Cost Allocation Plan and are not allocated in the Police Departmental Cost Plan.
- Fleet Management Costs associated with maintenance of Police vehicles are allocated based on the number of vehicles in the Police pool, Police-Aviation has been excluded.
- **Jail** Costs associated with services provided to the Jail and inmates are allocated based on the number of inmates booked.
- **Property** Costs associated with property management are allocated based on the number of FTE positions, excluding Police-Aviation.
