The New Way to Well

Video: <https://youtu.be/atlnn5Ct-uA>

Coordinated care from the moment your client steps through the door

- Extended and weekend hours at select locations
- On-site labs
- Coordinated care, including prescriptions

Care that revolves around you

Take advantage of our available resources, including providers, pharmacists, and care managers that work closely with your primary care provider to ensure your health and wellness needs are met.

Convenient Care

Whether you are scheduling a same-day clinic visit or a virtual chronic care follow-up, we want to make sure you're connected to care. Visit villagemedical.com to schedule your next appointment, or talk to your primary care provider about home-based services.

Medication Support

Pharmacists work with your primary care provider to ensure your medication is available, accurate and ready to be picked up or delivered on the scheduled date. Talk to your primary care provider to learn more.

Care Team Communication

Sign up for the Village Medical portal where you can send a message to a member of your care team and view other health resources.

Clinical Support Programs

Our team-based approach includes access to additional clinical support programs. Talk to your primary care provider about available support services to help you take care of your health and wellness.

Staying connected will be the key to success.

Meeting with your care team on an ongoing basis supports improvements in your overall health.

- **Your goal is to meet with your primary care provider and/or care team every 90 days, including one annual wellness visit with your primary care provider.**
- **Schedule your next appointment immediately after your current one, to help you stay on track.**

Appointments are conveniently available in-clinic, virtually or in a home setting. We're ready to support you.

Village Medical at Home

Village Medical at Home is a team of experienced providers who serve complex-needs, high-risk patients, by assessing and treating them in their homes and coordinating care with their primary care physician and care team.

Who can benefit from the program?

- Physician-prescribed for patients with complex needs who cannot get to the clinic easily.
 - Most are elderly with 5 or more chronic conditions.
- Patients with complex care needs that require more time than a standard clinic visit.
- Patients in need of transitional care visits.

We look forward to caring for you!
