## County to County Migration (Top Ten States)

### Did you Know?

- 24% (10,293) of those who moved to Harris County are from the State of California, whereas only 17% from Harris County (5,579) moved out to the same State.
- Louisiana gained 7,977 people from Harris County and lost 8,420
- 5% and less are from the States of Colorado, Oklahoma, and Alaska.
- Overall, Harris County's most net gain is 14,387 persons, of which 33% (4,714) are from California, followed by 13% (1,845) from Alaska State and 11% (1,618) from New York State.
- 5% and less gain received from the States of Tennessee, Georgia, South Carolina and Illinois.

**Inflow from Other States to Harris County  
Persons 16 Years and Over**

*Note: County-to-County Migration data is collected by American Community Survey between 2008 and 2012 to show how many residents move from one specific county to another, during the course of a year*

*The data shows the origin and destination of people 16 years and older by their most recent primary occupation during the same period.*

*Only the top ten states (of inflow to Harris County) are considered for the analysis.*
