ACTIVITY #2
RESIDENTIAL TYPOLOGIES

DESCRIPTION:
Typology 2C has a significant range of variation, in terms of building age and traditional development patterns. It retains a moderate percentage of buildings that “contribute” to a historic district (fewer than in Typologies 2A and 2B). The lots are predominantly oriented to the North/South, similar to 2A (whereas the lots in 2B are oriented to the East/West). Its streets have a mix of those with curb & gutter and those without. This results in different parking patterns and garage locations.

Distinguishing Neighborhood Features:
• Rectilinear street grid
• Moderate street widths
• Narrow, rectangular-shaped lots
• No alleys

Distinguishing Site Features:
• Uniform front yard setbacks
• Front yards are open and inviting.
• Parking varies greatly. As a result, more parked cars can be noticed in front and side yards.
• Driveways are not always present. This results in less space between buildings.

Distinguishing Building Features:
• Both 1 & 2-Story houses are common.
• Most buildings date from the period of historic significance, typically from the 1880s and into the 1920s.
• Homes are modest in scale. Most range from 1,000 sf to 1,500 sf.
• A moderate percentage of new buildings and additions appear to be out of scale with historic buildings.
• One and two-story porches are present and orient to the street.
• Primary entrances face the street.
