ACTIVITY #2

RESIDENTIAL TYPOLOGIES

DESCRIPTION:
Typology 3D has a significant range of variation, in terms of building age and traditional development patterns. It has a low percentage of buildings that “contribute” to a historic district. The lots are predominantly oriented to the East/West. Streets have curb & gutter throughout (unlike other Group 3 typologies). Building setbacks have a moderate degree of variance due to a shallower pattern from new development.

Distinguishing Neighborhood Features:
- Rectilinear street grid
- Narrow street widths
- Formal on-street parking
- Large & deep, rectangular-shaped lots
- Alleys are present throughout

Distinguishing Site Features:
- Front yards are occasionally fenced.
- Parking varies greatly. Garages are accessed from both front yards and alleys.
- Driveways are not always present. This results in less space between buildings.
- Moderate amount of Block End Cap scenarios.

Distinguishing Building Features:
- Both 1 & 2-Story houses are common.
- A low amount of buildings date from the period of historic significance, typically from the 1920s and into the 1940s. A significant amount of new buildings have been constructed since the 1980s.
- Homes size varies significantly. Most range from 1,000 sf to 3,500 sf.
- A significant percentage of new buildings and additions appear to be out of scale with historic buildings.
- One-story porches are typical and orient to the street.
- Primary entrances face the street.

Houston, TX: Historic District Design Guidelines Project
Workshop 1 - September 27, 2016
