

PUBLIC HEARING REPORT

I-1: Southeast Houston Mobility Plan

APPLICANT: City of Houston Planning and Development Department

JURISDICTION: City of Houston
COUNCIL DISTRICT: D & I

PRECINCT: Harris County Pct. 1 & 2

PROPOSAL:

The City of Houston Planning and Development Department is requesting the addition, reclassification, or deletion of the thoroughfares and collector streets listed below to the Major Thoroughfare and Freeway Plan (MTFP). The requested amendments were included in the Southeast Houston Mobility Plan.

BACKGROUND INFORMATION:

The Southeast Mobility Plan was the City of Houston's multimodal mobility study (inclusive of vehicular, transit, pedestrian, bicycle and freight) in the area bounded by Interstate 610 to the north, State Highway 288 to the west, Sam Houston Toll Road to the south, and Interstate 45 and Galveston Road to the east. The Plan was completed in June 2019 and will be used to guide the City of Houston's short, mid and long-term multimodal mobility planning efforts. Funded by Houston-Galveston Area Council (H-GAC) with a local match provided by the Gulfgate TIRZ and Council Districts D and I, the Plan engaged a wide range of stakeholders, including TxDOT, Harris County, Hobby Area Management District, Mayor's Office for People with Disabilities, as well as many economic development organizations, civic associations and residents in the study area.

Southeast Houston plays an important role in Houston's landscape and economic competitiveness, containing the nation's 36th largest airport, an extensive bayou trail network, and a dynamic collection of neighborhoods. According to the Houston-Galveston Area Council, the study area is expected to increase by 50% in population, 58% in households, and 19% in employment. Traffic volumes along the roadways are also expected to increase by 44%. Much of the anticipated growth is expected to occur in the south portion of the study area. This added stress will increase existing mobility gaps and add strain on the transportation systems in the area, making it critical to identify and overcome the mobility shortcomings that residents are currently experiencing.

The Plan recommends a variety of multimodal mobility improvements that fall into six categories: 1) Build out major corridors to enhance connectivity and spur development; 2) Facilitate context-sensitive street design for each major corridor; 3) Right-size streets and reallocate right-of-way to enhance public realm; 4) Increase bikeway connectivity between Sims Bayou and surrounding neighborhoods; 5) Align sidewalk and bikeway investment with METRO's planned transit investments; and 6) Prioritize improvements related to the community's goals and objectives. Part of the recommendations included proposed amendments to the MTFP. The requested amendments are included on the following table.

No.	Street	Street Segment	Amendment Request
1	Allison Rd	Almeda Genoa to Mykawa Rd	Add minor collector
2	Almeda Genoa Rd	Furman to South Freeway 288	Reclassify from Major Collector to Major Thoroughfare

PUBLIC HEARING REPORT

No.	Street	Street Segment	Amendment Request
