PUBLIC HEALTH FACILITIES

The FY2008-2013 CIP for the Department of Health and Human Services (HDHHS) will use available funds to make repairs/improvements necessary to raise the standards of existing facilities in meeting health and safety mandates and to preserve the City's assets. The plan also provides for the redesign of interior workspace to improve efficiencies for the delivery of health and human services to the general public.

Through the Buildings-to-Standard Program, a survey was conducted on all of the facilities to determine building conditions, document needs, and establish priorities for improvement. Facilities 10 years and older were given the highest priority. Improvements include foundation repairs, roof replacements, mechanical, electrical, and plumbing system upgrades, replacement of floor coverings, ceiling replacements, and improvements to interior finishes and casework. The Buildings-To-Standards Program is ongoing and will continue to be a departmental priority well beyond the five-year CIP. Other CIP strategies include gearing facility improvements toward increasing operational efficiencies in both health centers and Multi-Service Centers (MSC).

The FY2010-2014 Public Health Facilities Improvement Program totals $65 million, and includes a proposed $2.5 million in CDBG funded projects.

PUBLIC HEALTH FACILITIES

Highlights of the Adopted FY2010-2014 CIP include:

- Purchase and renovation of an existing laboratory building to replace the severely deteriorated Central Health Lab facility.
- Design and Replacement of Sunnyside Health Center and Multi-Service Center.
- Expansion to the Animal Control Center.
- Design and Renovation for Multi-Service Centers Acres Homes and Tri-Community.
- Replacement of roofs and HVAC units at various department buildings.
