SOLID WASTE MANAGEMENT FACILITIES

The Solid Waste Management Department uses bond funds to maintain and preserve physical assets, improve and expand services to citizens, and efficiently manage environmental mandates.

Short and long term improvements totals, ensure continuous manageable solid waste disposal and recycling services, especially in newly developed or newly annexed areas.

Recently the Department successfully completed the design and construction of the $4M House Hold Hazardous Waste Center located at 11500 South Post Oak Blvd.

Funding for the Solid Waste Management departments program is provided primarily through issuance of Public Improvement Bonds. The amount of spending projected for the 2010-2014 program totals $10.8 million in PIB.

Highlights of the Adopted FY2010 – 2014 CIP include:

- Underground storage tank remediation at the Northwest Service Center: Construction will begin in July of 2009, and its scheduled completion is December 2009.
- Two New Neighborhood Depositories: Located at 9003 N. Main and 10785 Southwest Freeway. Construction will begin in July of 2009, and scheduled completion is February 2010.
- Paving & Drainage Improvements at the Southwest Service Center: Construction will begin in July of 2009 and scheduled completion is February 2010.

SOLID WASTE MANAGEMENT FACILITIES
